User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a

unified Salesforce environment.

1. INTRODUCTION

1.1 Project Overview :

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations—from admission to course completion—are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

1.2 Purpose :

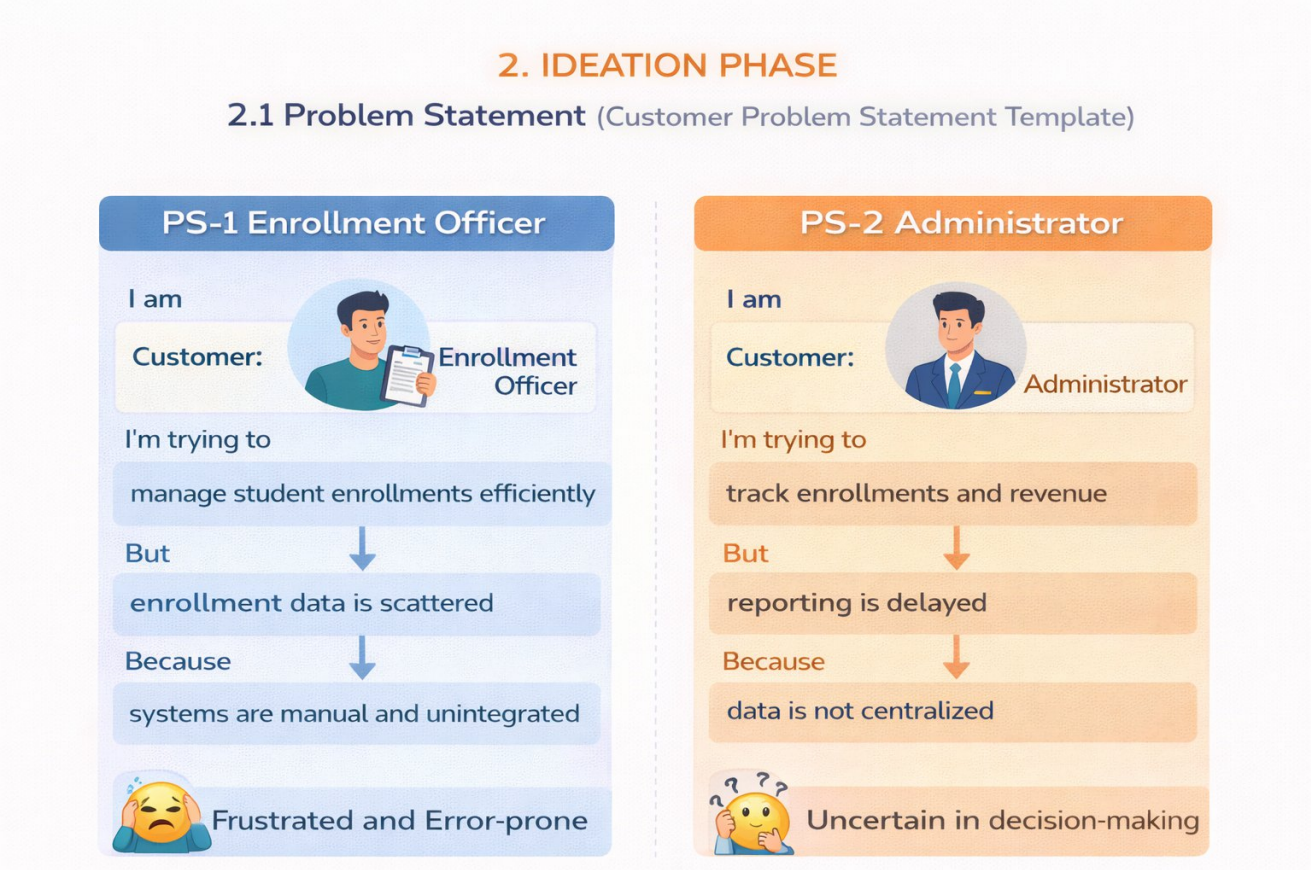

The primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

Accurate student data management
Structured enrollment workflows
Automated approvals and validations
Transparent reporting and monitoring

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

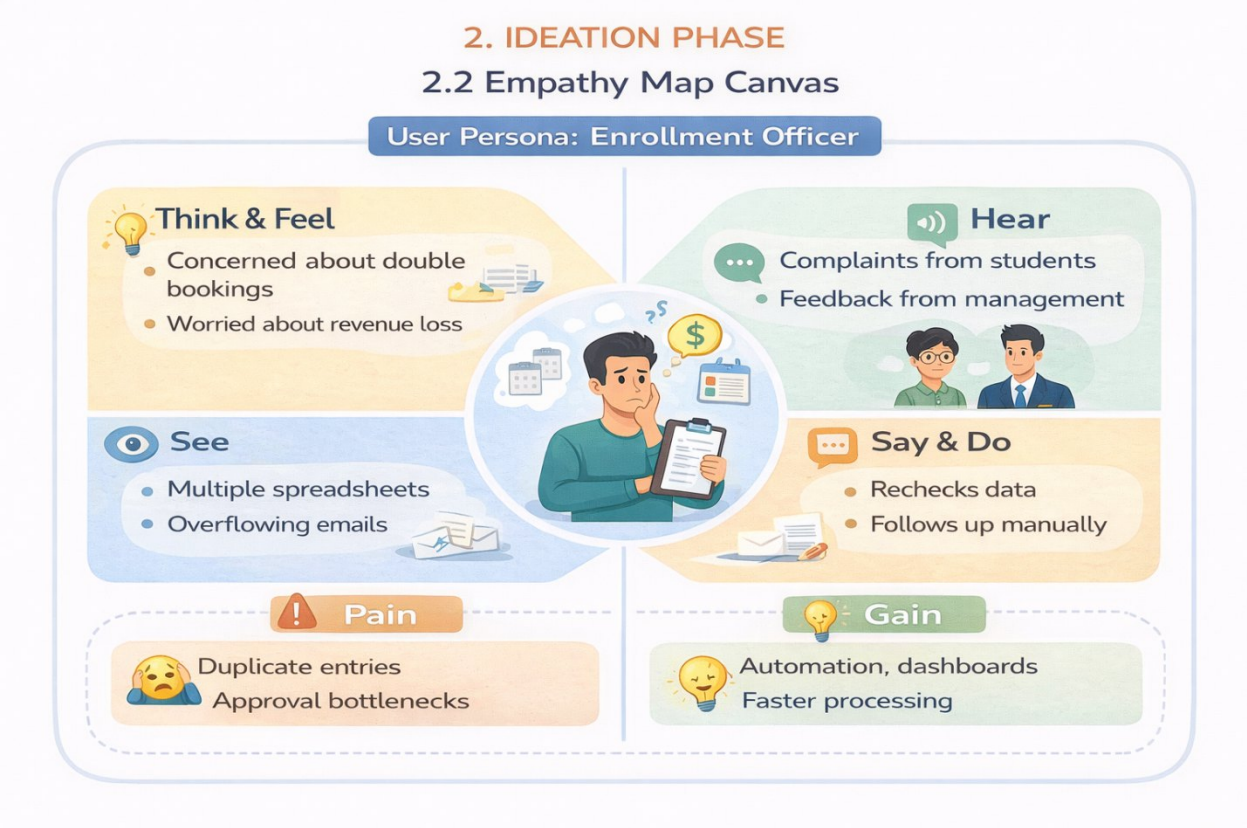

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-2	Administrator	track enrollments and revenue	Reporting is delayed	data is not centralized	uncertain in decision making
PS-1	Enrollment	manage	enrollment	systems	frustrated

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

Think & Feel: Concerned about double bookings and revenue loss
Hear: Complaints from students and management
See: Multiple spreadsheets and emails
Say & Do: Rechecks data, follows up manually
Pain: Duplicate entries, approval bottlenecks
Gain: Automation, dashboards, faster processing

2.3 Brainstorming & Idea Prioritization

Step 1 – Brainstormed Ideas

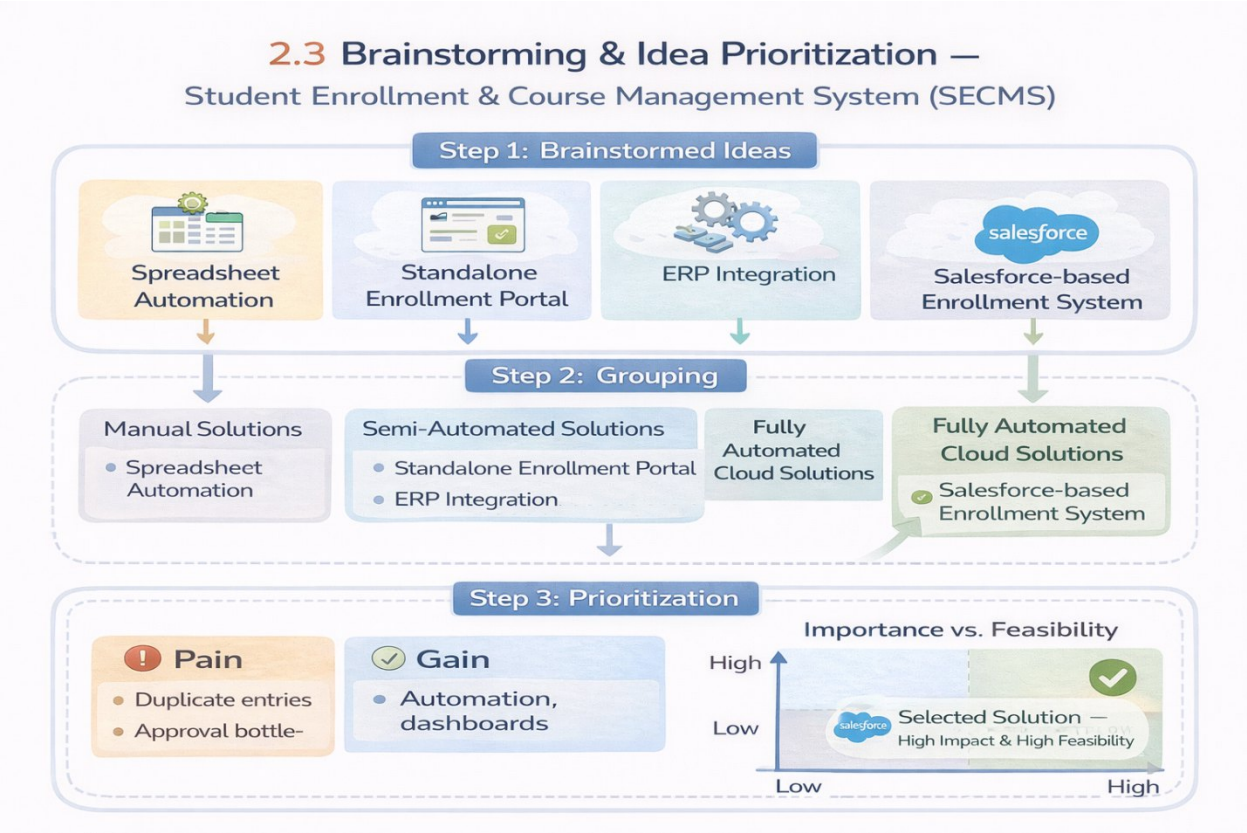

Spreadsheet automation
Standalone enrollment portal
ERP integration
Salesforce-based enrollment system

Step 2 – Grouping

Manual solutions
Semi-automated solutions
Fully automated cloud solutions

Step 3 – Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact**

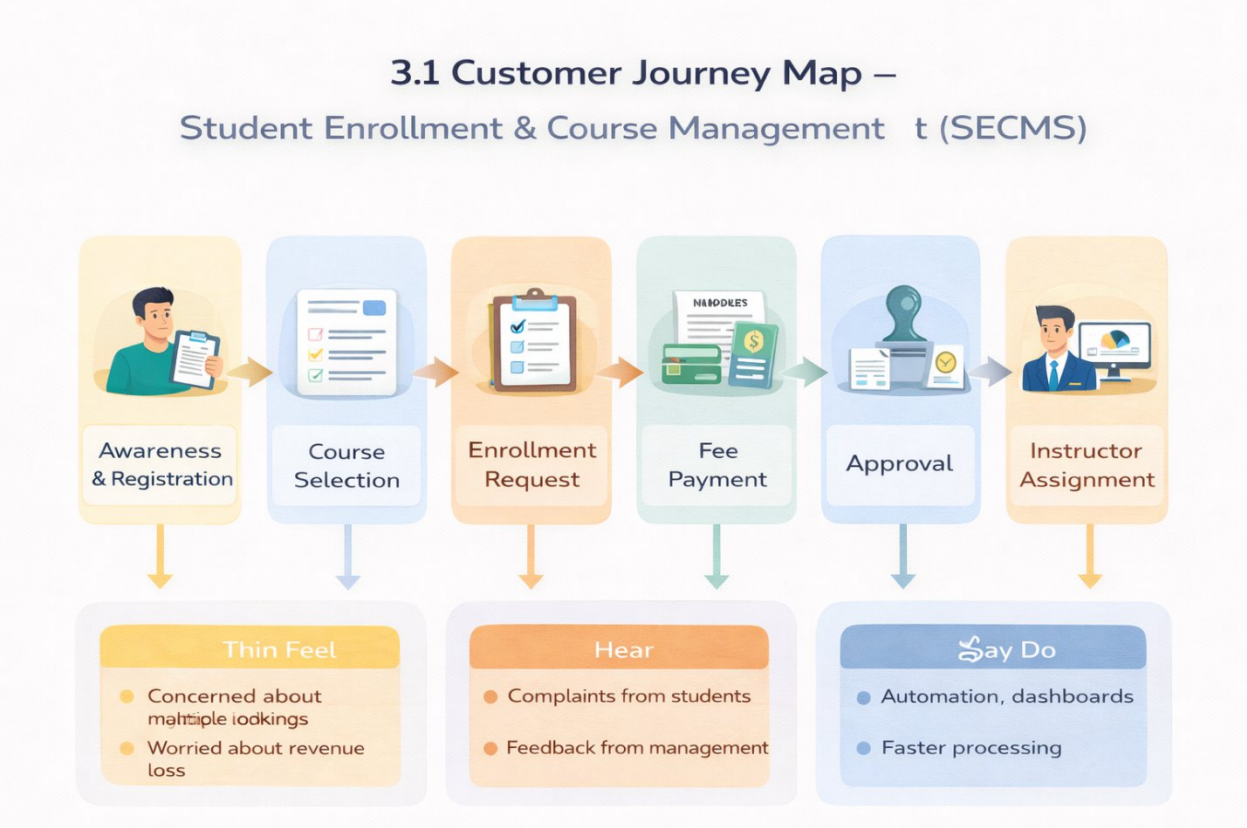

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages covered:

Awareness & Registration
Course Selection
Enrollment Request
Fee Payment
Approval
Instructor Assignment
Reporting & Completion

3.2 Solution Requirements

Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments
FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors.

Examples:

Quick student registration form
One-click enrollment approval
Role-based dashboards

NFR-2: Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples:

Only admins can modify course details
Instructors view only assigned students
Students cannot access other student records

NFR-3: Reliability

The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

No duplicate course registration
Accurate status updates after approvals
Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

Quick dashboard refresh
Fast search for student records
No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

Add new departments without redesign
Handle increased admissions annually
Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

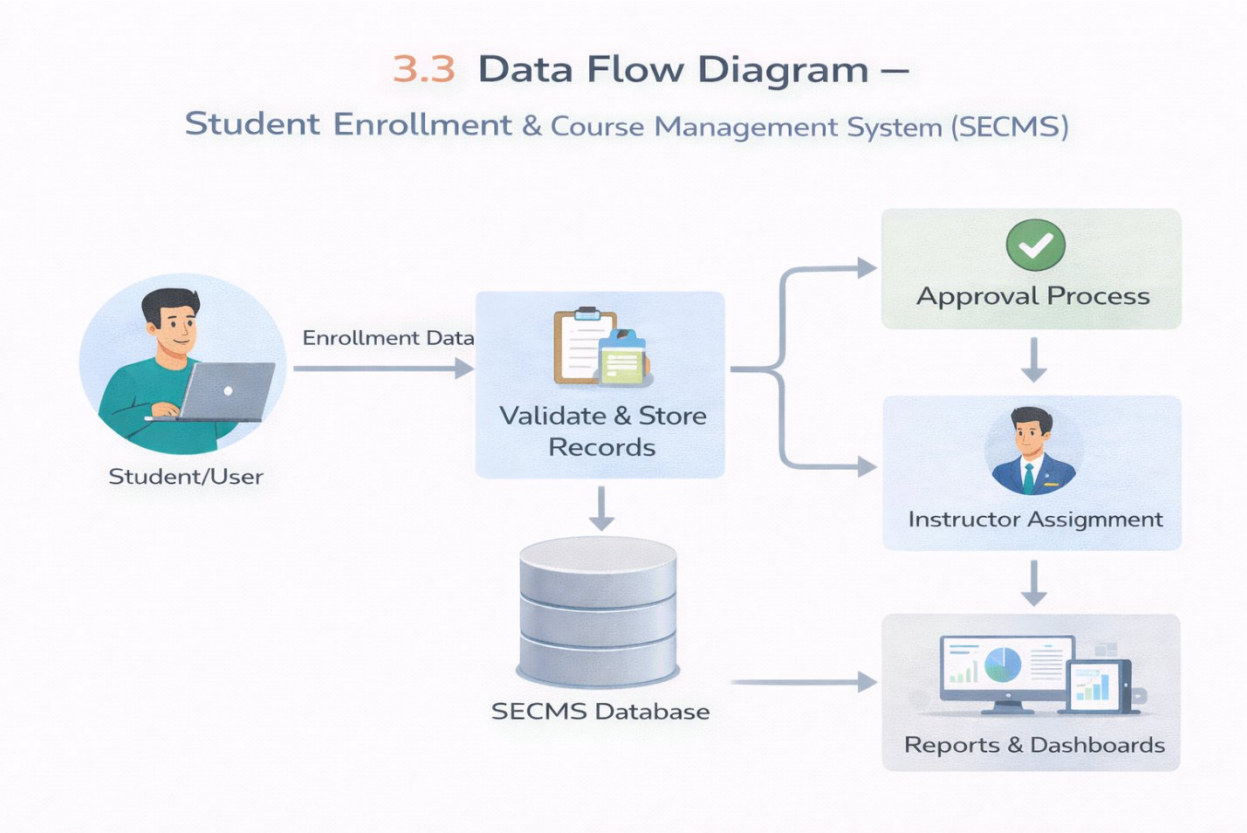

Examples:

24/7 cloud access
Reliable during peak admission season
Automatic backup of student records

3.3 Data Flow Diagram

User inputs student and enrollment data
System validates and stores records
Approval process routes data
Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

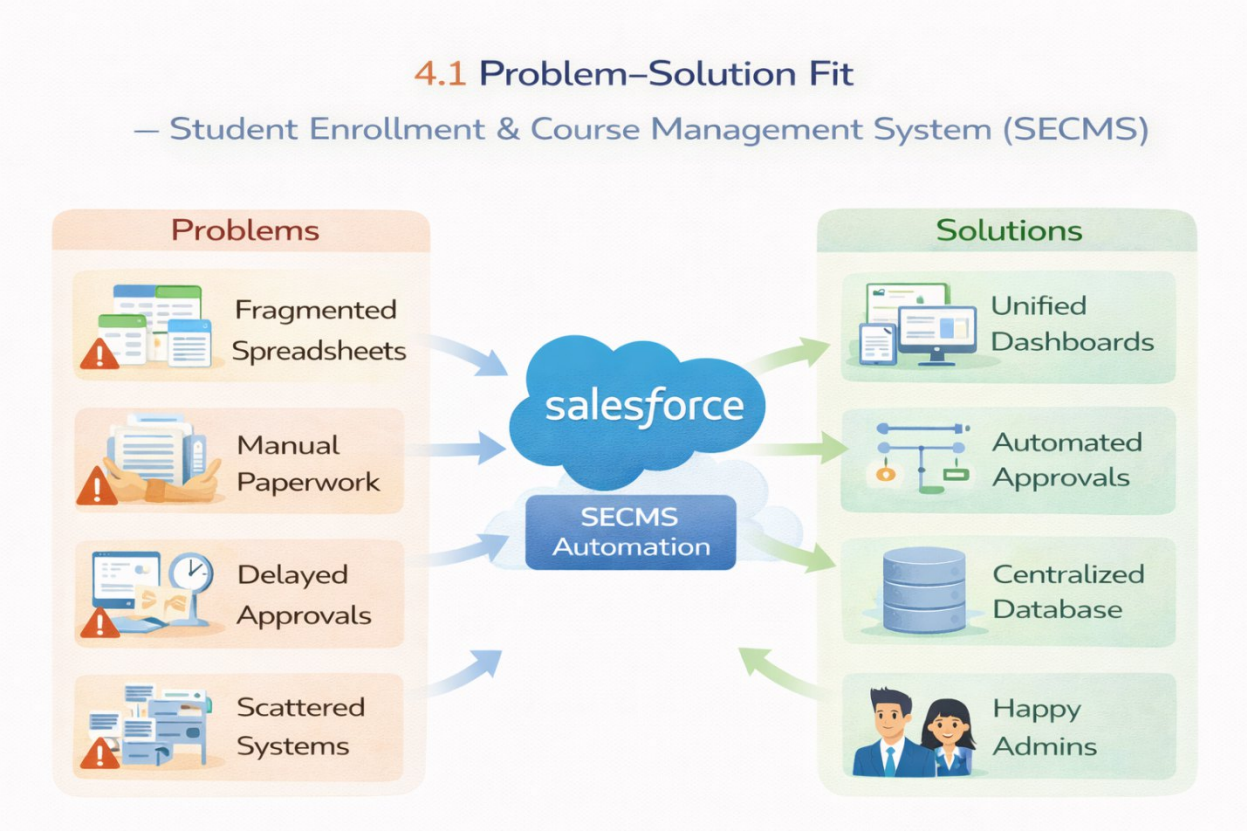

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning
Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

SECMS directlyaddresses fragmentedenrollmentworkflowsby aligninguser behavior, constraints, and automation using Salesforce-native capabilities.

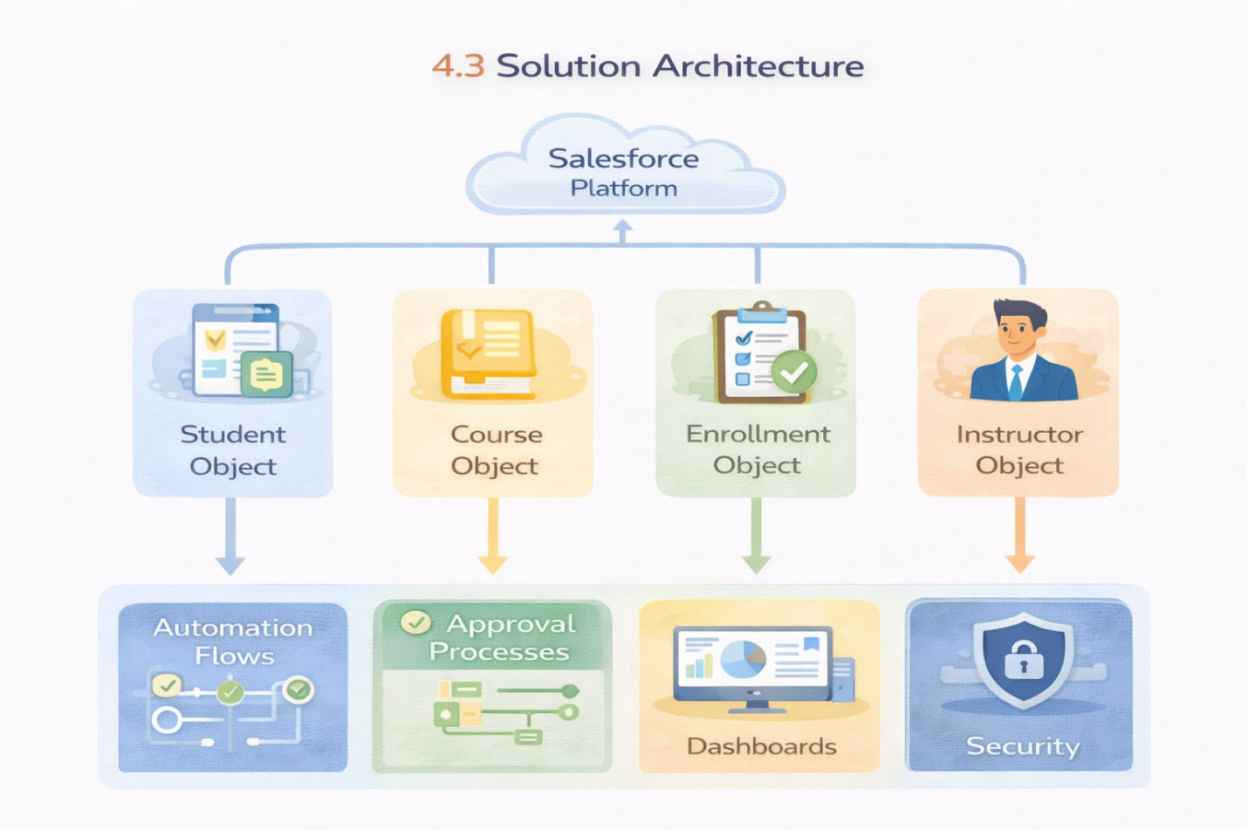

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

4.3 Solution Architecture

The architectureintegrates Salesforce objects, automationflows, approvalprocesses, dashboards, and security layers.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

Agile methodology
Epics → Stories → Story Points
Sprint-based execution
Velocity calculation used for estimation

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Tea m Me

						mbers
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create a Salesforce developer account so that I can configure and deploy the Student Enrollment system..	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create custom objects for Student, Course, Enrollment, and Instructor so that academic data can be stored and managed efficiently.	3	High	Member2
Sprint-2	Data Modeling	USN-3	As a user, I want dedicated tabs for each object so that I can easily navigate between students, courses, enrollments, and instructors.	3	High	Member3
Sprint-2	Data Modeling	USN-4	As an admin, I want to create relevant fields such as student details, course information, and enrollment status so that complete records can be captured accurately.	5	High	Member4
Sprint-2	Data Modeling	USN-5	As an enrollment officer, I want a centralized Lightning App so that I can access all academic operations from one interface.	3	High	Member4
Sprint-2	Data Modeling	USN-6	As an admin, I want to defin relationships between students, courses, and enrollments so that the system can logically link and track academic activities.	5	Medium	Member1
Sprint-2	Data Modeling	USN-7	As a user, I want customized page layouts so that only relevant information is displayed, improving clarity and ease of data entry.	5	High	Member2
Sprint-3	Automation	USN-8	As a system, I want to validate input data such as mandatory fields and	3	High	Member4

			enrollment limits so that incorrect or incomplete records are prevented.			
Sprint-3	Automation	USN-9	As a system, I want automated flows to handle enrollment processing and notifications so that manual effort is reduced and processes become faster.	3	High	Member4
Sprint-3	Automation	USN-10	As an administrator, I want an approval process for enrollment requests so that registrations are verified before confirmation.	5	High	Member1
Sprint-4	Security	USN-11	As an admin, I want to configure role-based security so that users can only access data relevant to their responsibilities.	5	High	Member2
Sprint-5	Reports	USN-12	As a manager, I want reports on student enrollments, course registrations, and instructor assignments so that I can monitor academic operations.	4	High	Member3
Sprint-6	Dashboards	USN-13	As a manager, I want visual dashboards showing enrollment statistics and trends so that I can quickly analyze system performance.	4	Medium	Member4

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)

Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow:

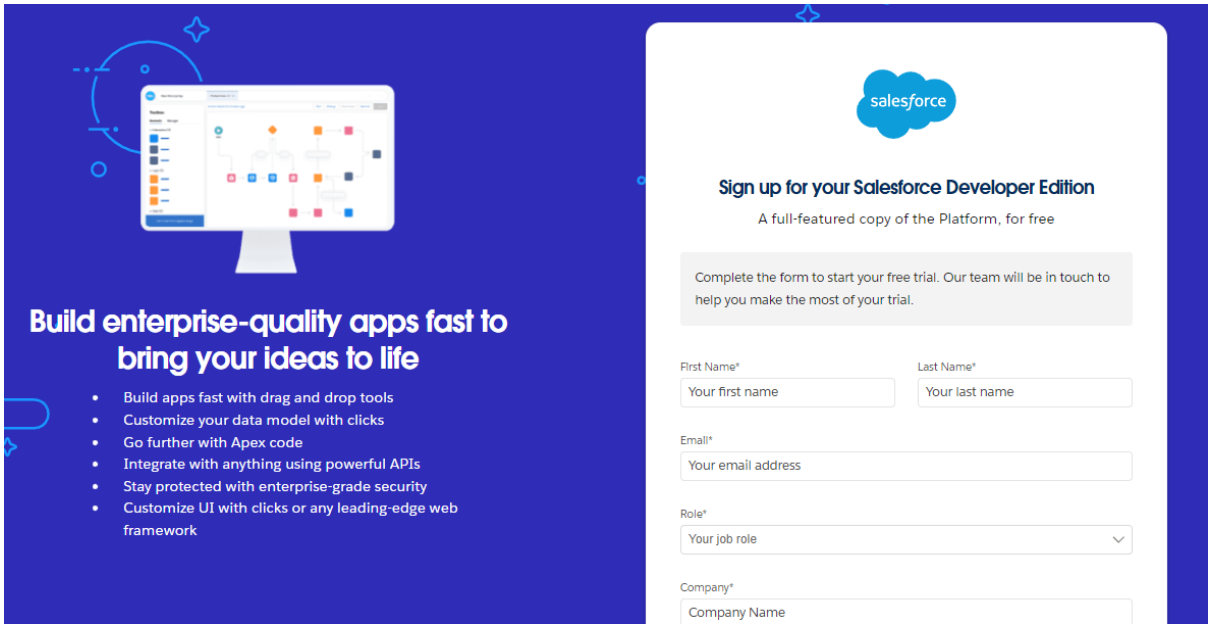

Milestone 1: Salesforce Developer Account Creation
Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)
Milestone 3: Tabs Creation
Milestone 4: Lightning App Creation
Milestone 5: Fields Creation
Milestone 6: Create Relationships
Milestone 7: Page Layout Customization
Milestone 8: Validation Rules
Milestone 9: Flows (Automation)
Milestone 10: Approval Process
Milestone 11: Reports
Milestone 12: Dashboards
Milestone 13: Security Setup
Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing

9. End-to-end application testing

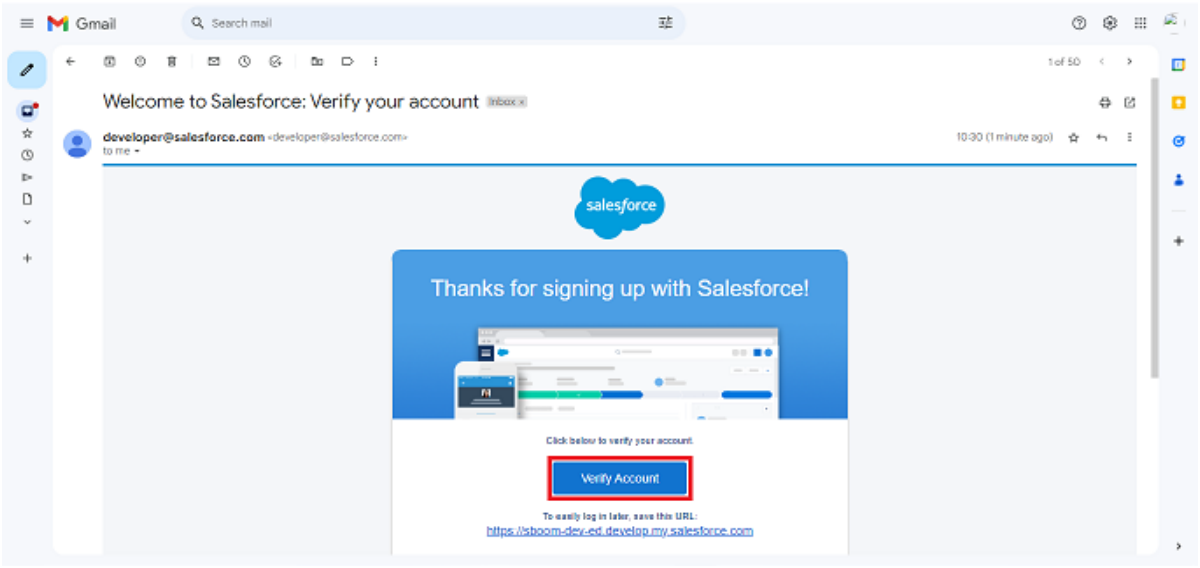

:

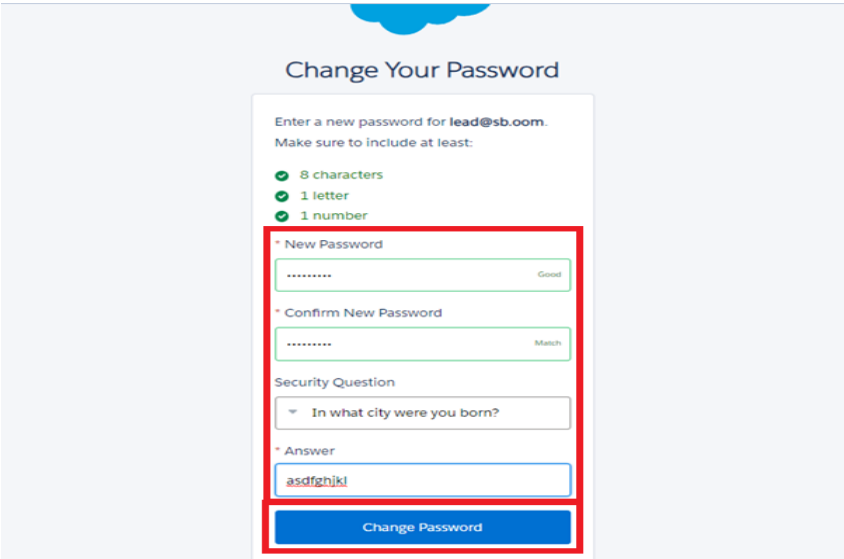

First name & Last name
Email
Role : Developer
Company : College Name
County : India
Postal Code : pin code
Username : should be a combination of your name and company
This need not be an actual email id, you can give anything in the format : username@organization.com
Click on sign me up after filling these.

Activity 2: Account Activation

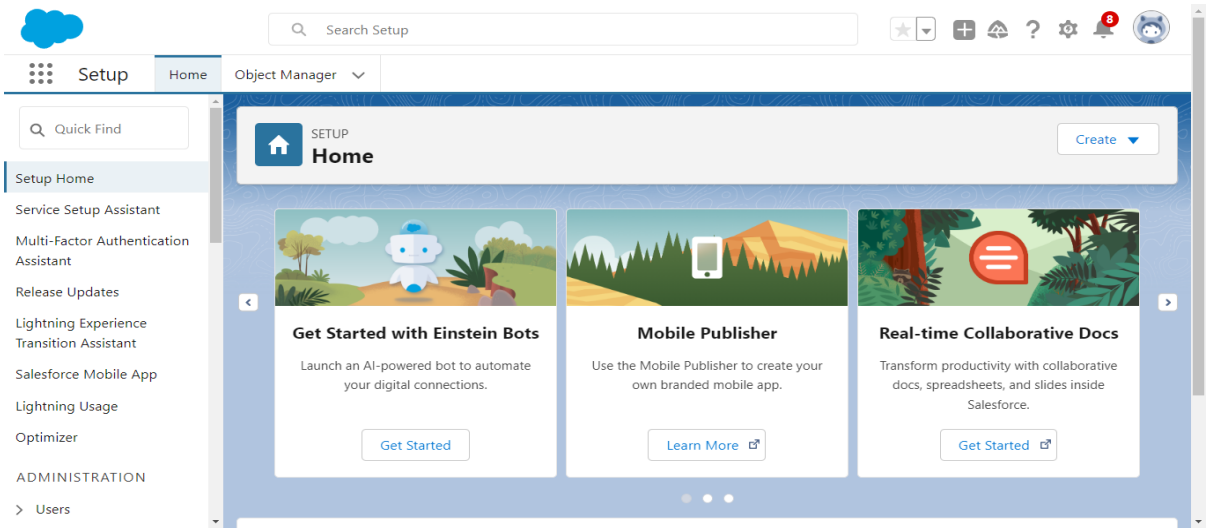

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Student object:

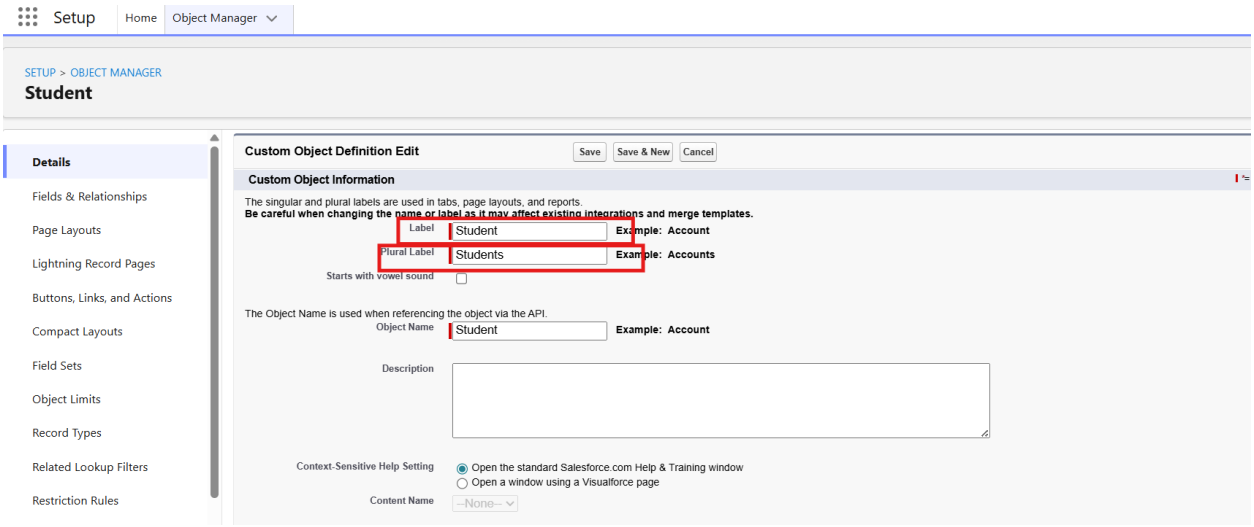

Go to the Setup page.

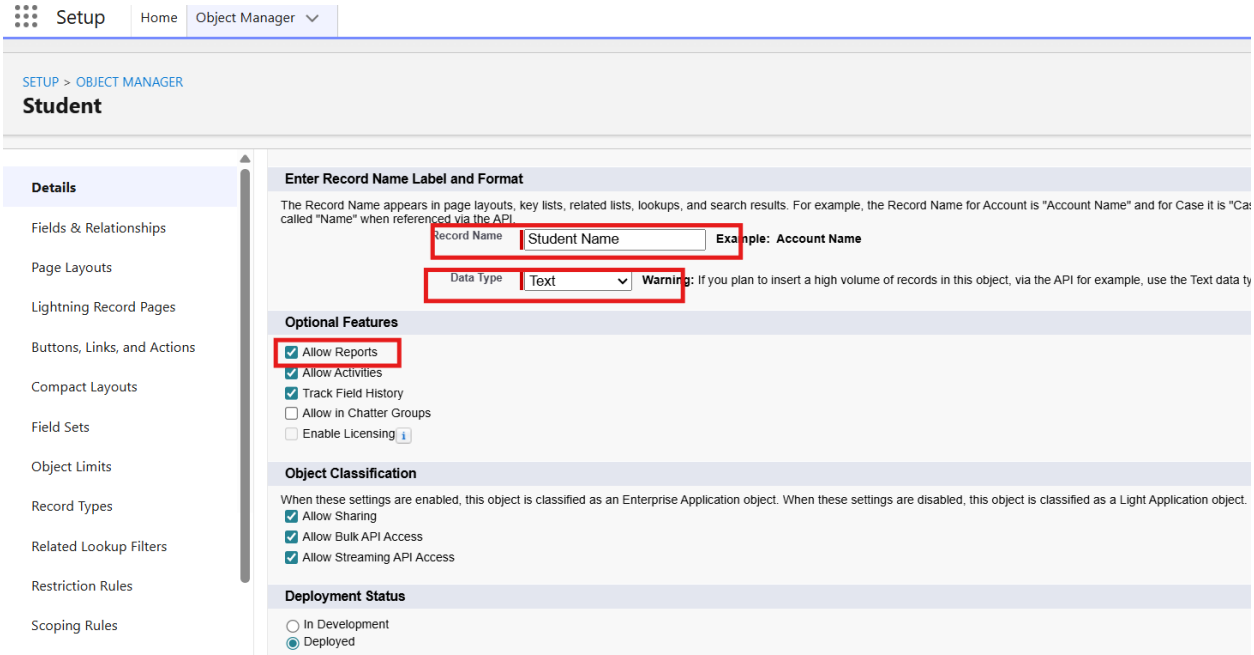

Click on Object Manager.

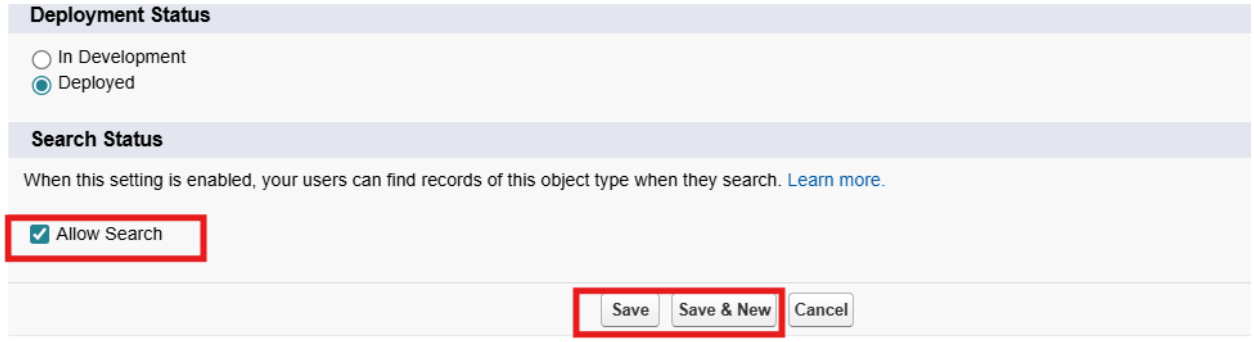

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)
10. Under Search Status, select:
11. Allow Search
12. Click Save.

Milestone 3 - Fields:

Table 1: Student Object Fields:

Field Label	Data Type
Student Name	Text (Standard)
Email	Email
Phone	Phone
Date of Birth	Date
Student Status	Picklist
Address	Text Area

Table 2: Course Object Fields:

Field Label	Data Type
Course Name	Text (Standard)
Category	Picklist
Duration	Number/Text
Course Fee	Currency
Description	Text Area

Table 3: Instructor Object Fields:

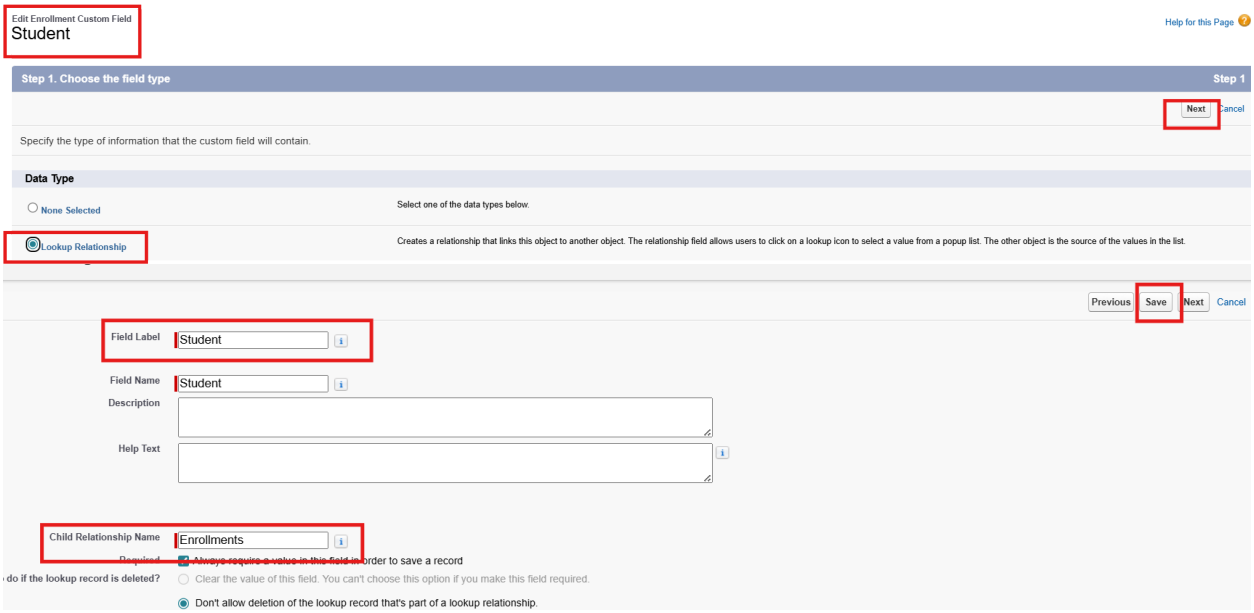

Field Label	Data Type
Instructor Name	Text (Standard)
Instructor Code	Text
Expertise	Picklist
Phone	Phone
Email	Email

Table 4: Enrollment Object Fields:

Field Label	Data Type
Student	Lookup (Student)
Course	Lookup (Course)
Instructor	Lookup (Instructor)
Enrollment Date	Date
Enrollment Status	Picklist
Fees Paid	Checkbox
Total Amount	Currency
Comments	Text Area

Milestone 4 – Create Relationships:

1. **Activity 1: Create Lookup from Enrollment to Student:**
   1. Go to Setup → click Object Manager.
   2. Type Enrollment in Quick Find → click Enrollment__c object.
   3. Click Fields & Relationships → click New.
   4. Select Lookup Relationship → click Next.
   5. For Related To, select Student__c → click Next.
   6. Enter Field Label: Student (API Name: Student__c).
   7. Click Next through Field-Level Security and Layout options (ensure it's visible and added to layout).
   8. Click Save.

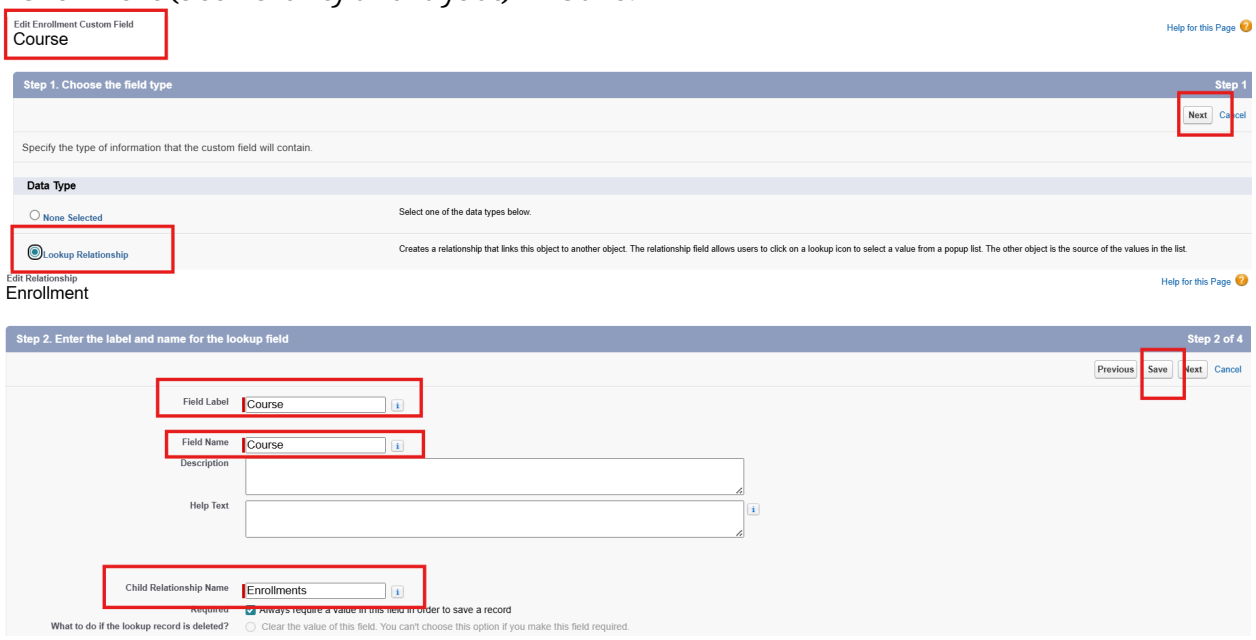

Activity 2: Create Lookup from Enrollment to Course

Purpose:
To link each Enrollment to a Course.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Select Lookup Relationship → Next.
4. Related To: select Course__c → click Next.
5. Field Label: Course (API Name: Course__c).
6. Click Next (set visibility and layout) → Save.

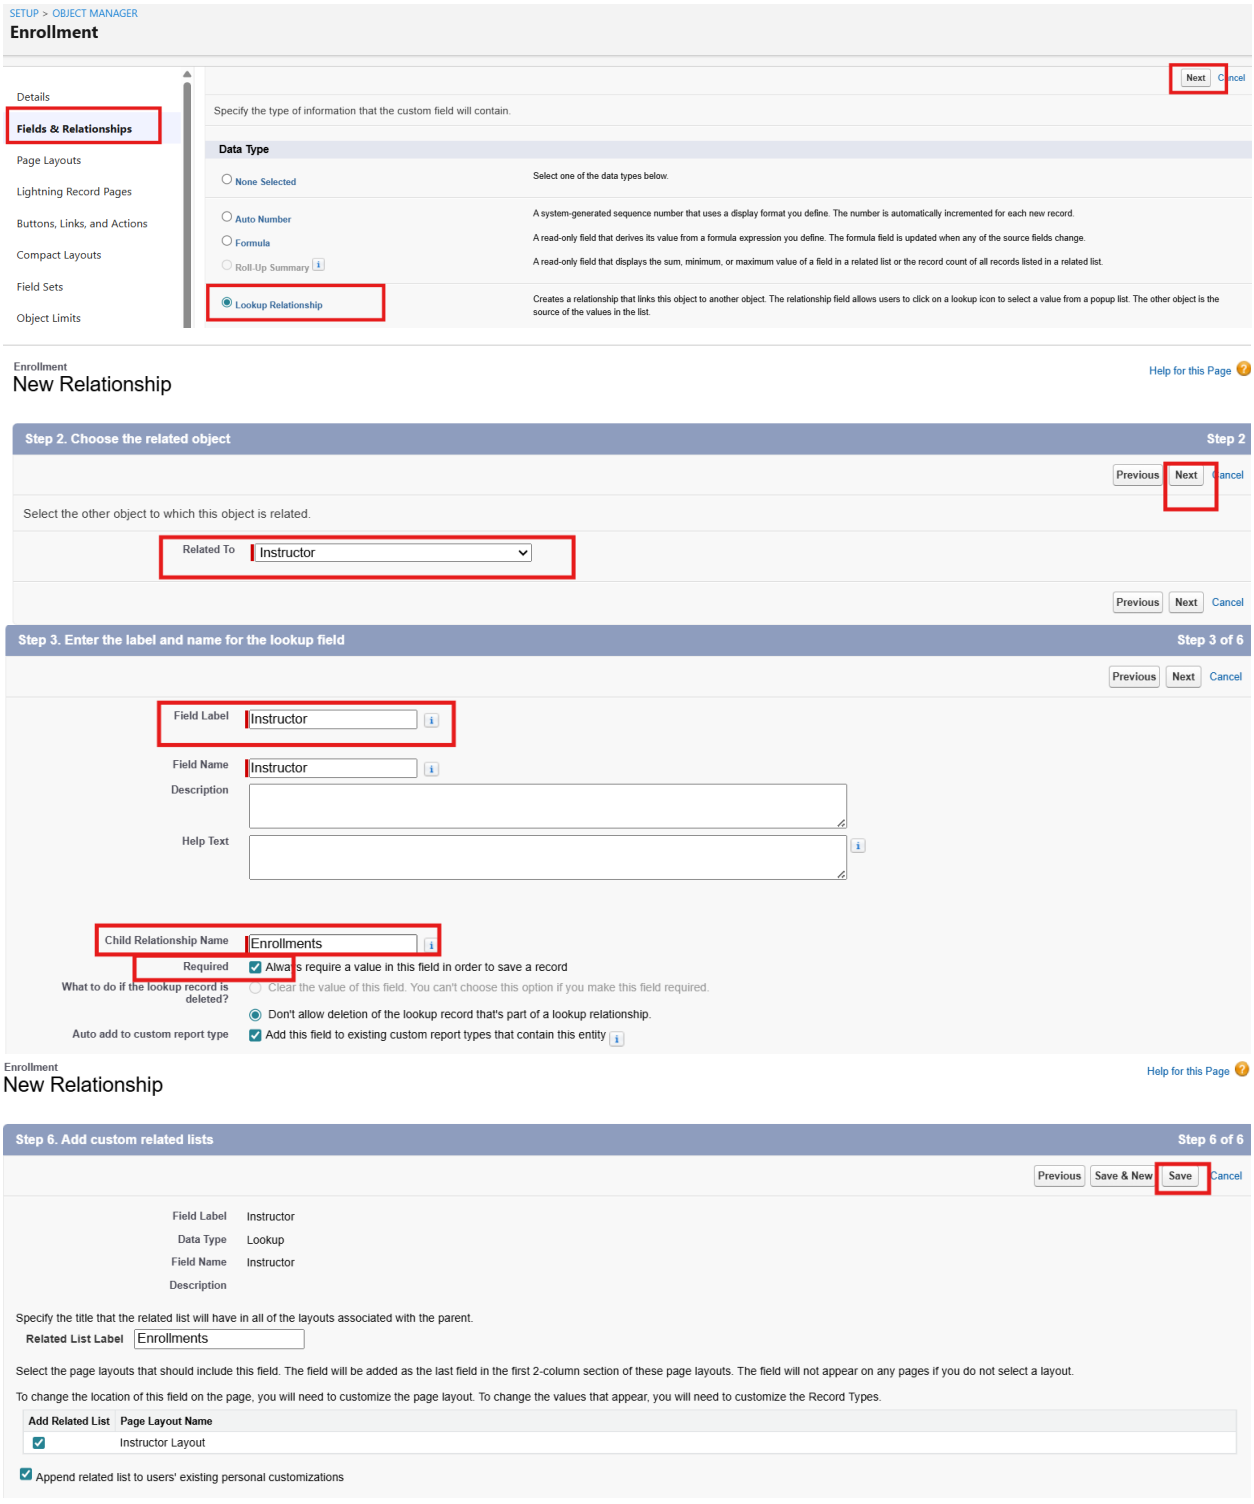

Activity 3: Create Lookup from Enrollment to Instructor:

Purpose:
To store which Instructor is assigned to a particular Enrollment.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Choose Lookup Relationship → Next.
4. Related To: select Instructor__c → Next.
5. Field Label: Instructor (API Name: Instructor__c).
6. Complete Field-Level Security and Page Layout options → Save

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

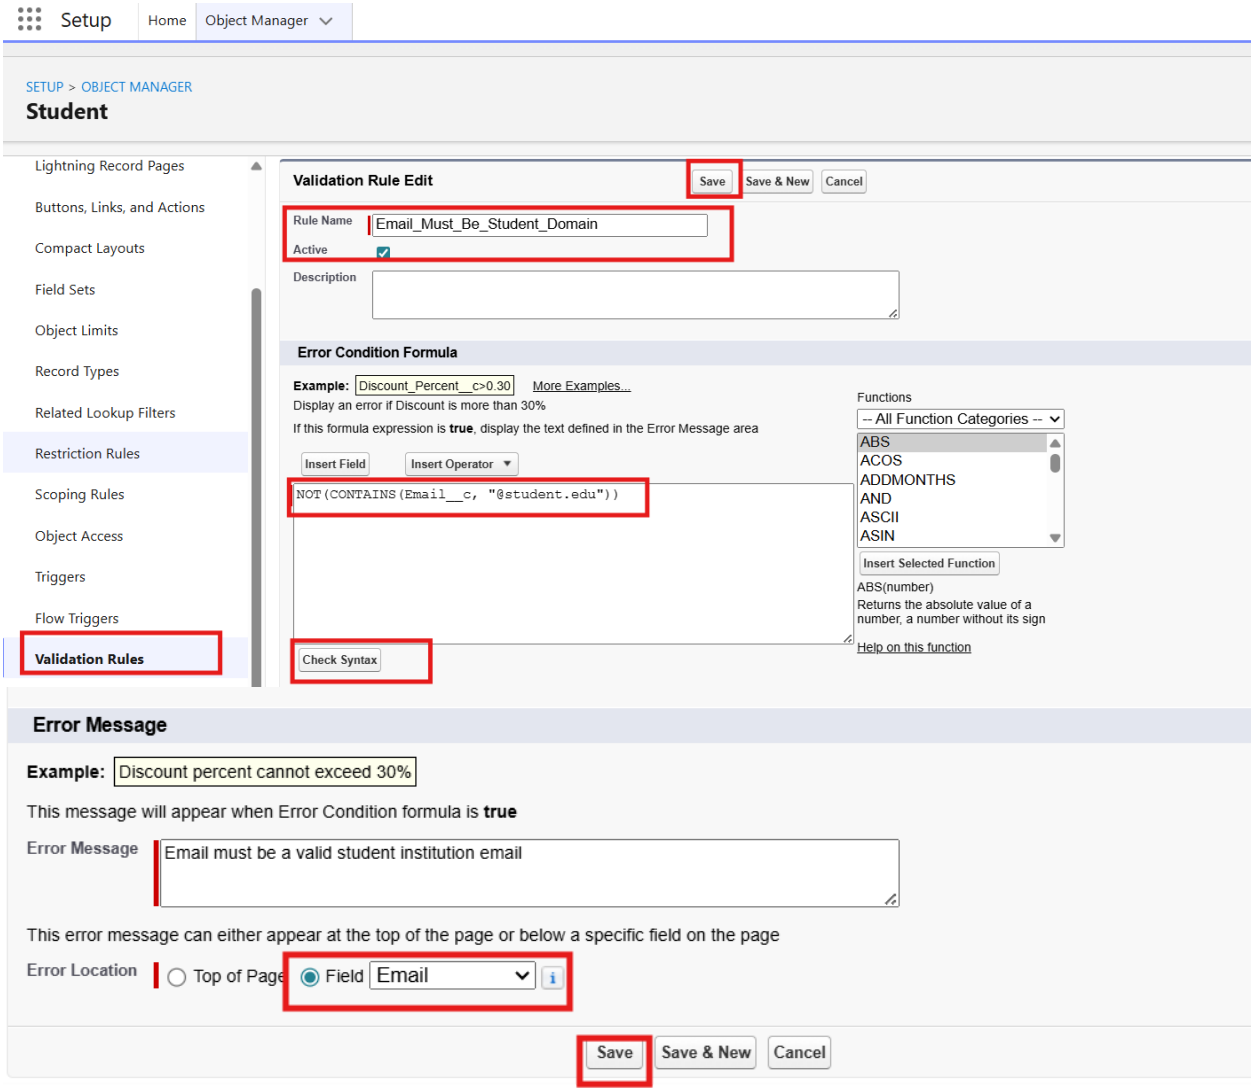

Purpose:
To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.
Click Validation Rules → New.
Rule Name: Student_Email_Domain_Validation.
Error Condition Formula: (example for @student.edu)

```
NOT(CONTAINS(Email__c, "@student.edu"))
```

Error Message: Email must be a valid student institutional email.
Error Location: Field → Email__c.
Click Save.

Activity 2: Fees Must Be Paid Before Approval

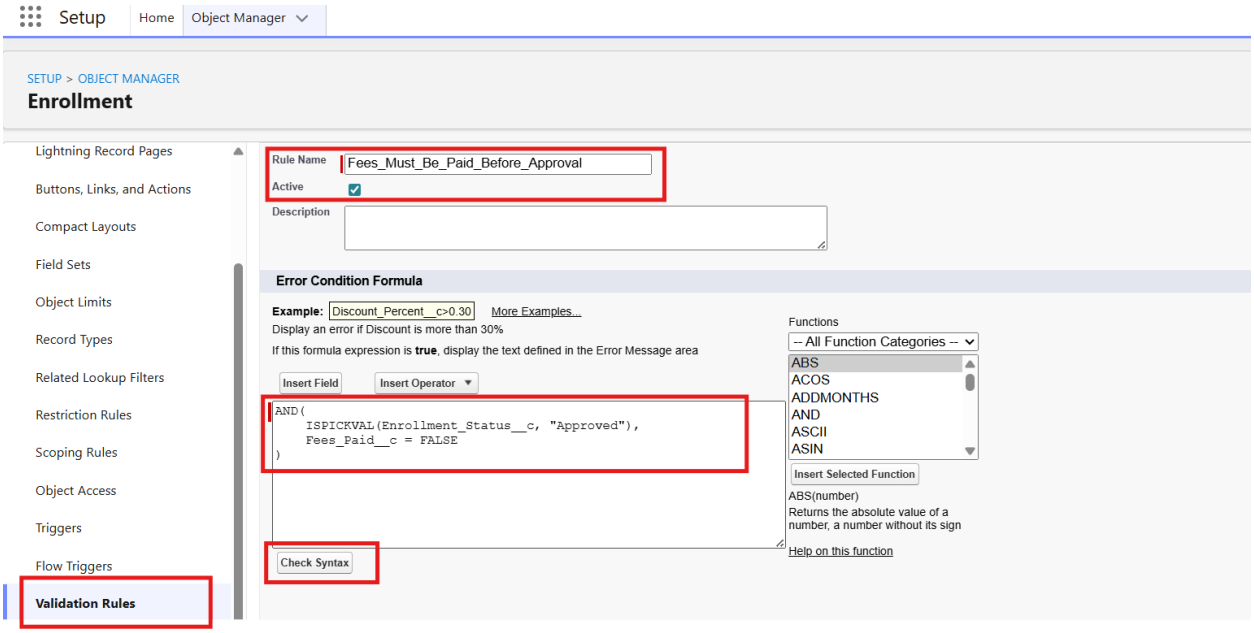

Purpose:
Prevent Enrollment from being approved until fees are paid.

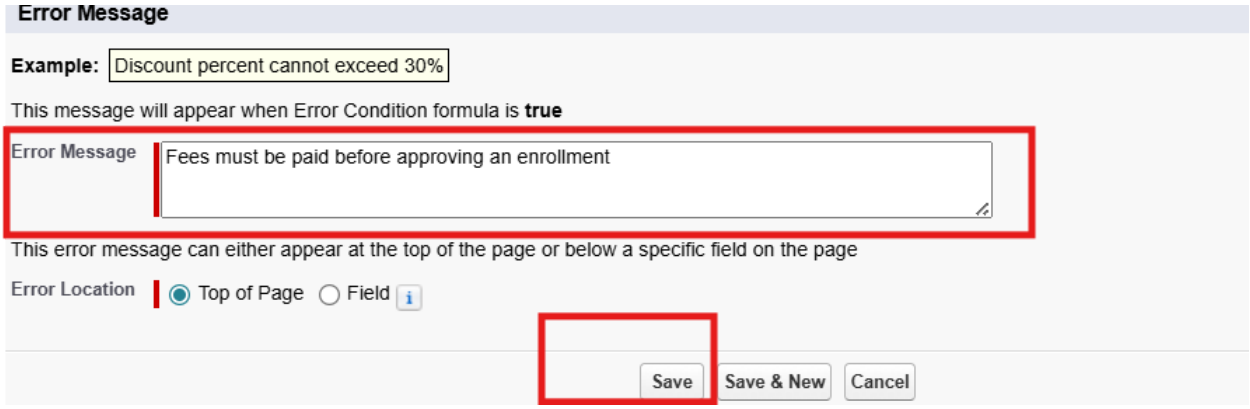

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Validation Rules → New.
3. Rule Name: Fees_Must_Be_Paid_Before_Approval.
4. Error Condition Formula:

```
AND(
  ISPICKVAL(Enrollment_Status__c, "Approved"),
  Fees_Paid__c = FALSE
)
```

5.Error Message: Fees must be paid before approving an enrollment.
6.Error Location: Top of Page (or field as needed).
Click Save.

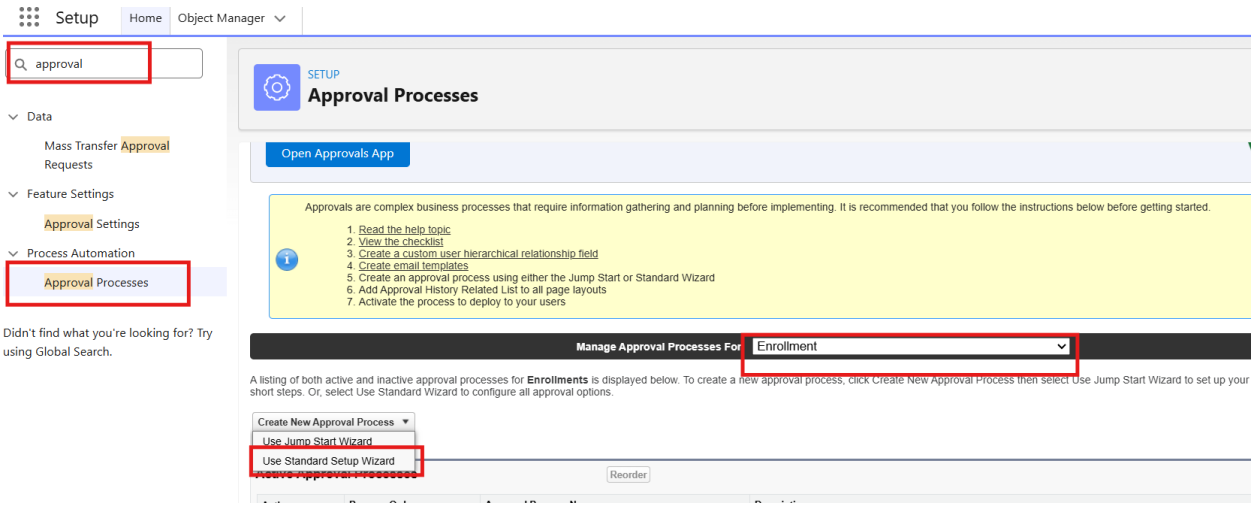

Milestone 6 – Approval Process

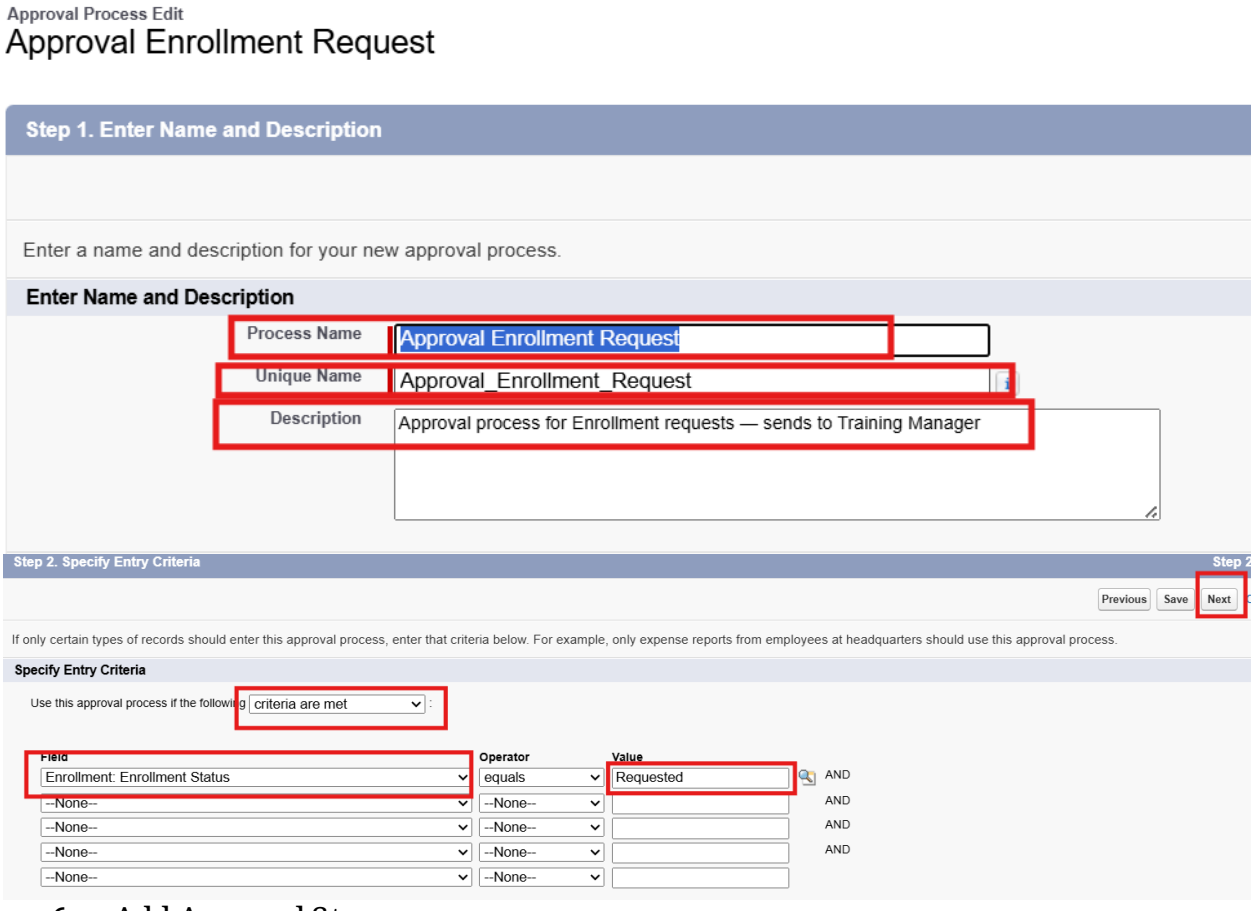

Activity 1: Create Approval Process for Enrollment Requests

Purpose:
Route Enrollment requests to the Training Manager for approval or rejection.

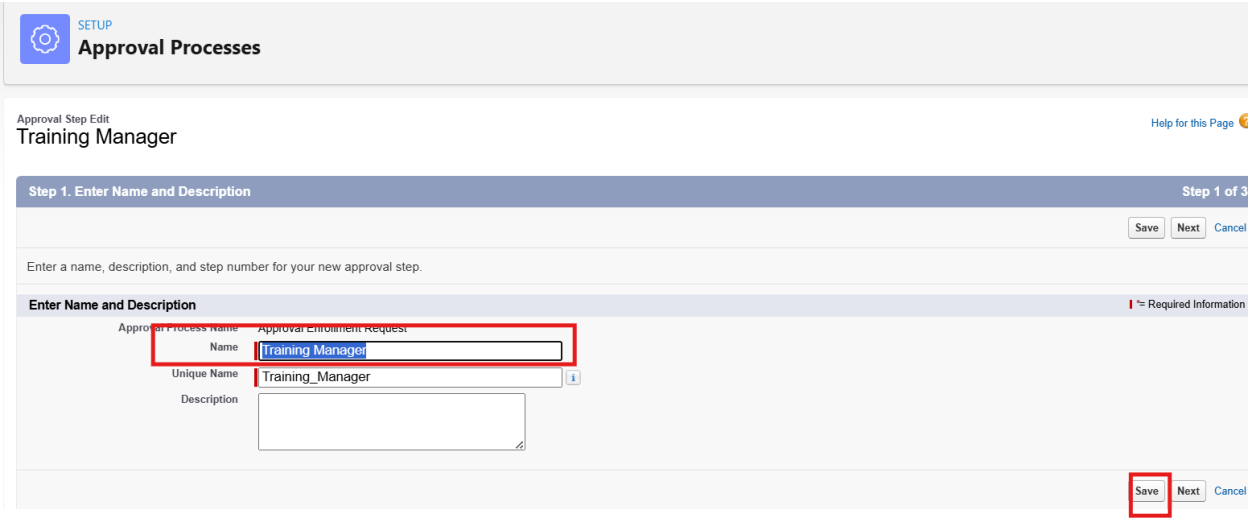

Steps:

1. Go to Setup → Approval Processes → select Enrollment__c.
2. Click Create New Approval Process → Use Standard Setup.
3. Process Name: Approval_Enrollment_Request.
4. Entry Criteria: Enrollment_Status__c = "Requested".
5. Save and configure steps.

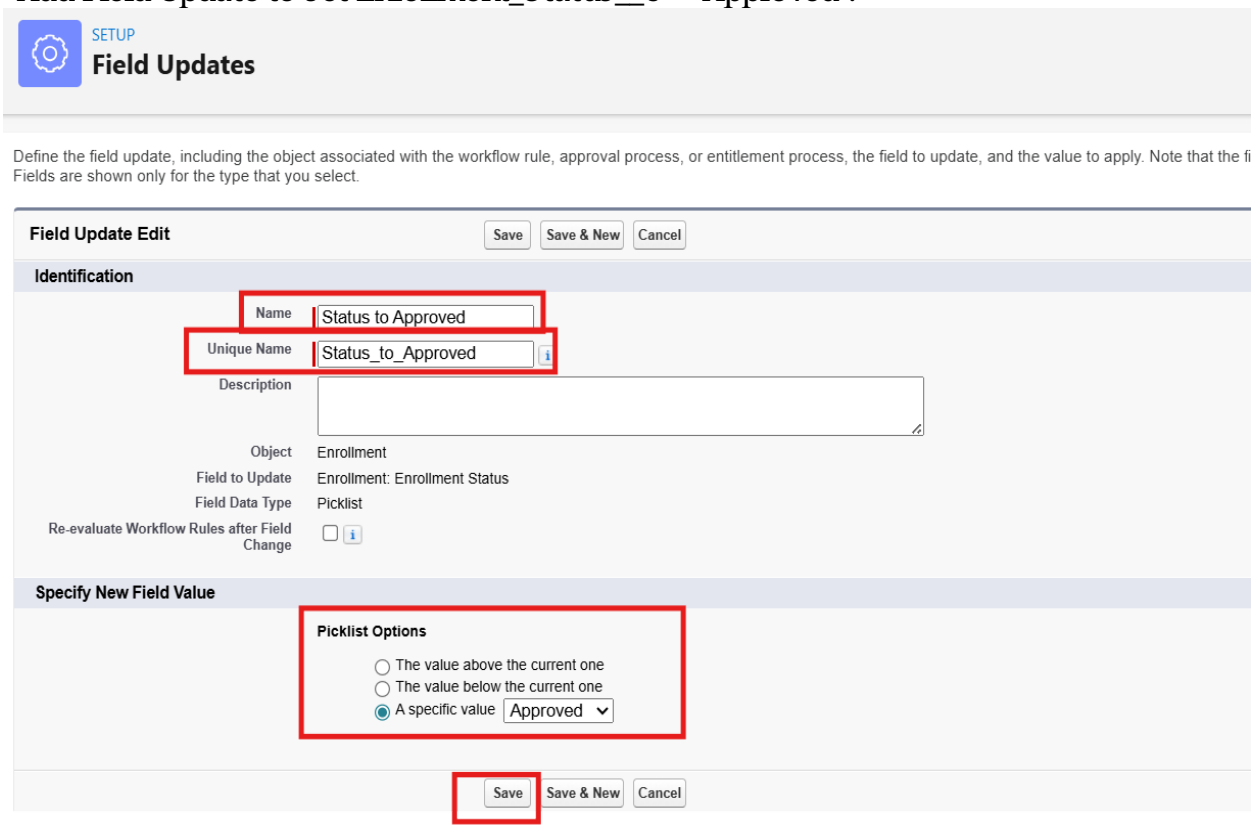

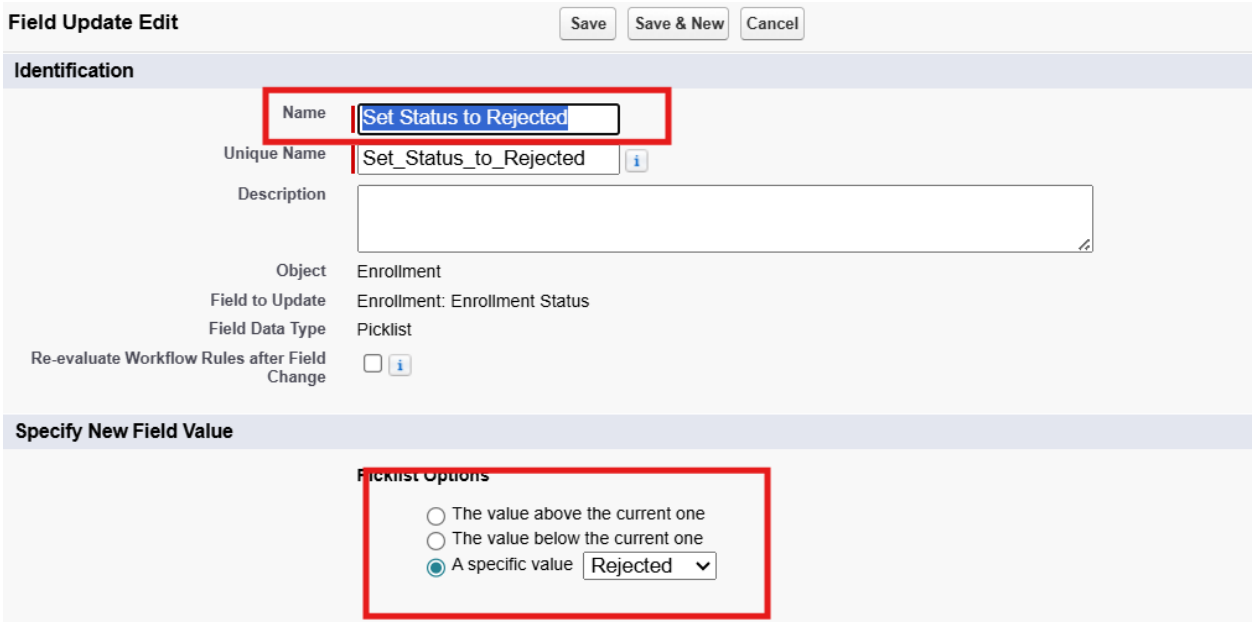

6. Add Approval Step:
7. Approver: specific Training Manager user.

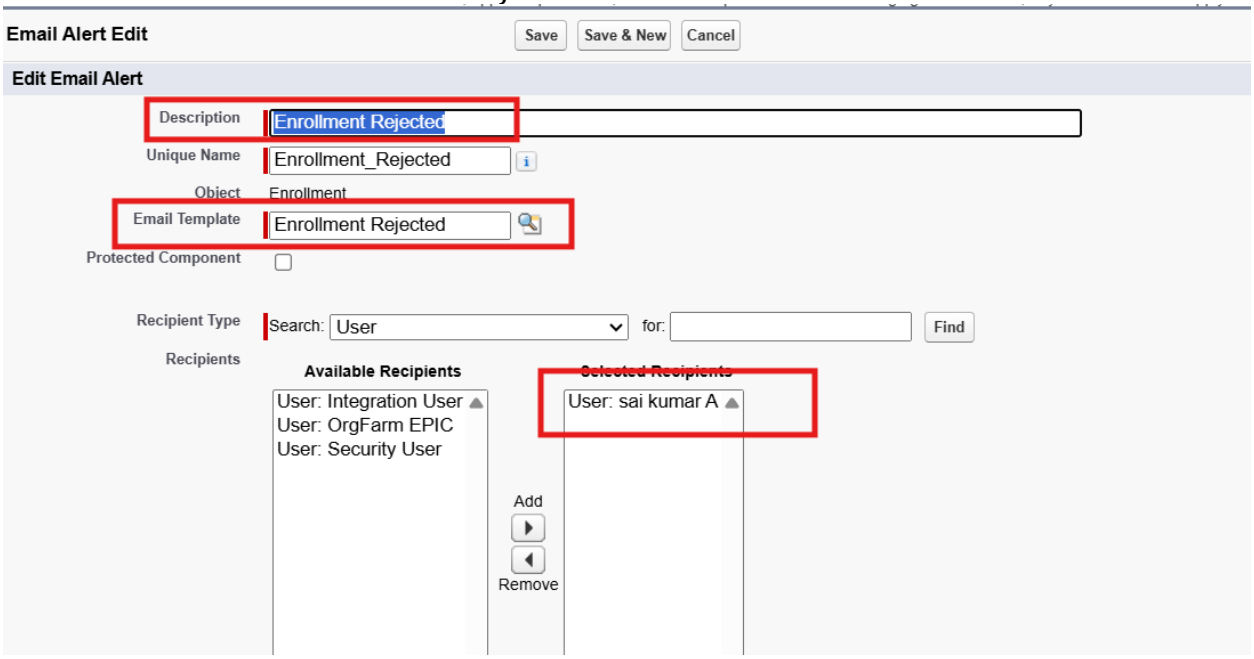

8. Under Final Approval Actions:
9. Add Field Update to set Enrollment_Status__c = "Approved".

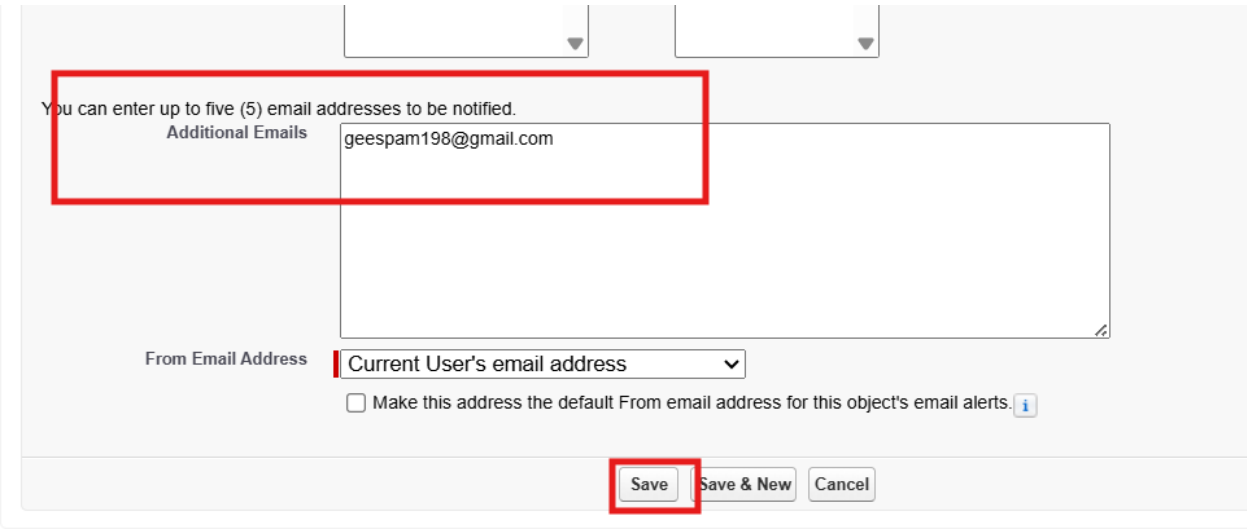

10. Under Final Rejection Actions:
11. Add Field Update to set Enrollment_Status__c = "Rejected".

12. Add Email Alert to send rejection email to student.

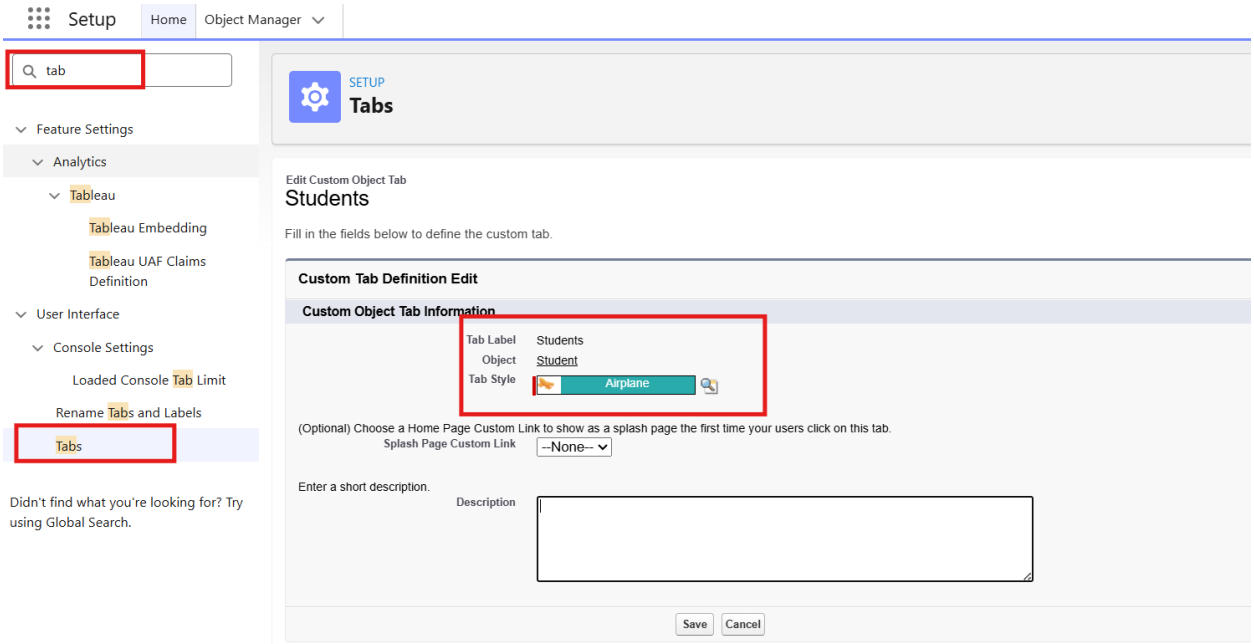

13. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:

Go to Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.
4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.
Follow the same steps as mentioned in Activity -1

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box.
Click New Lightning App.
Provide the app details:
App Name: Student Enrollment & Course Management
Developer Name auto-fills
Description: Optional, but can describe the purpose of the app
Click Next and choose the following settings:
App Branding (optional): Add logo or select color theme
Navigation Style: Choose Standard Navigation
Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer,**

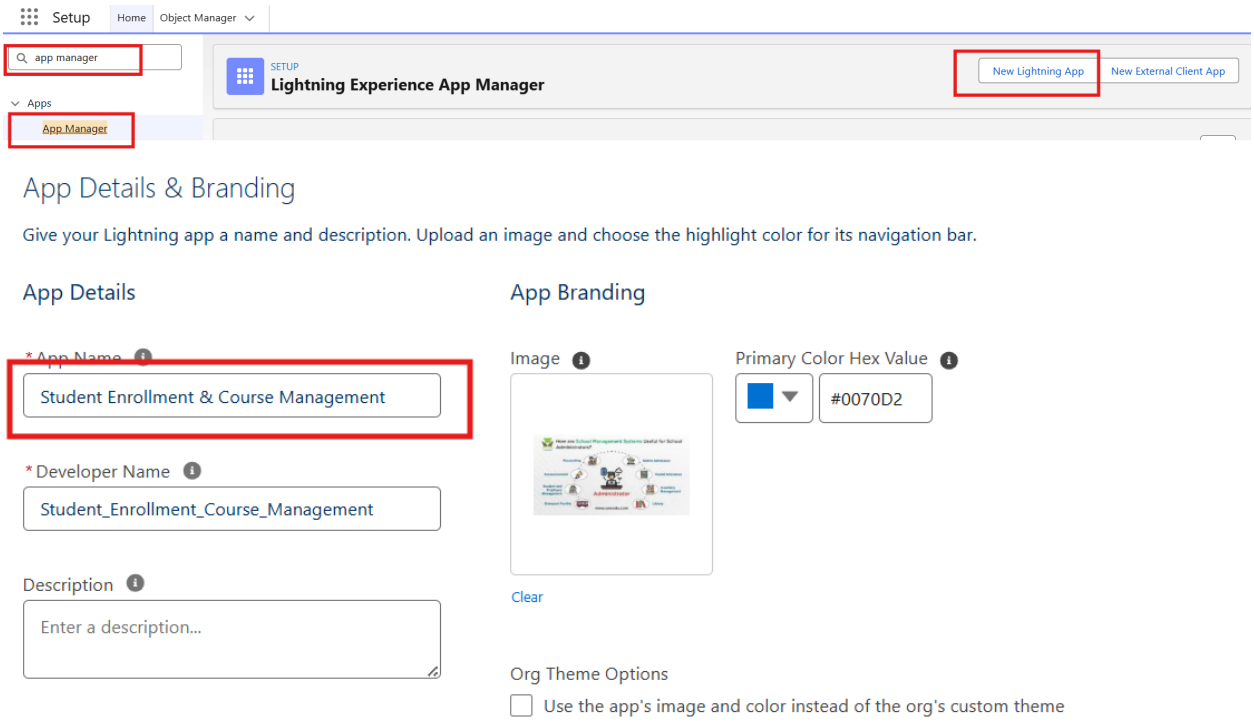

Instructor.

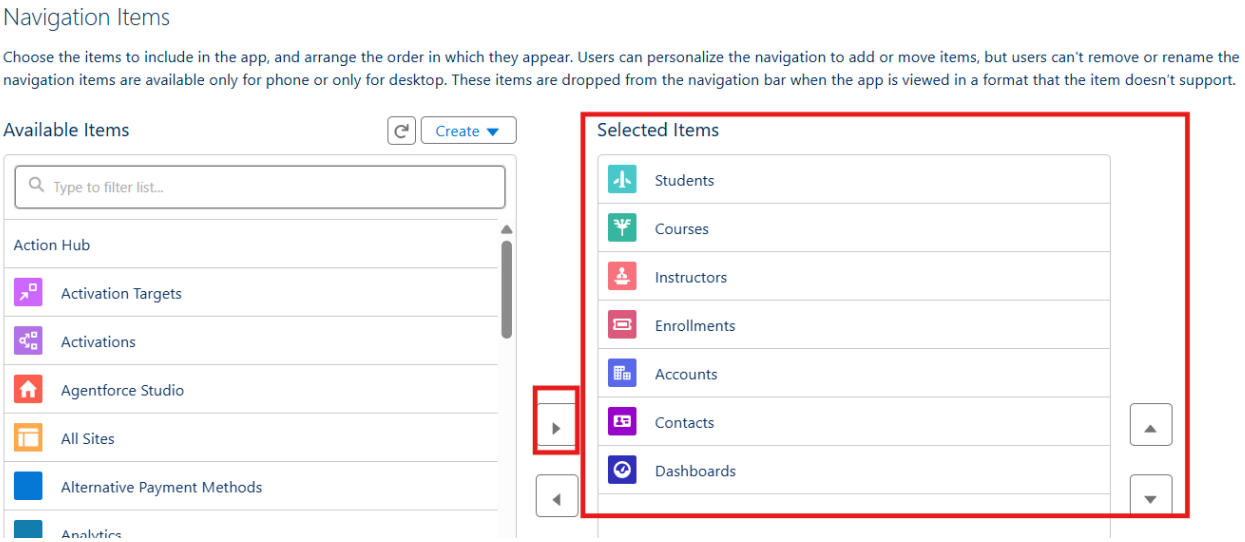

Click Next to select the items (tabs) to be included in the app. Add:

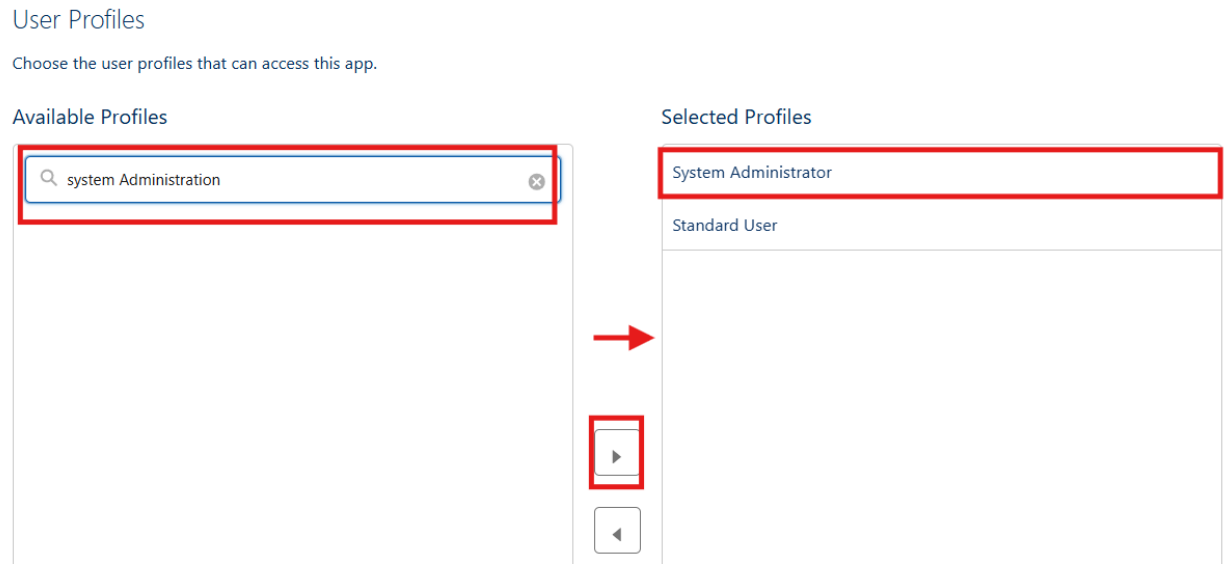

1. Student
2. Course
3. Instructor
4. Enrollment
5. unReports
6. Dashboards
7. Home
8. Tasks

ext and review the app settings.

Finally, click Save & Finish.

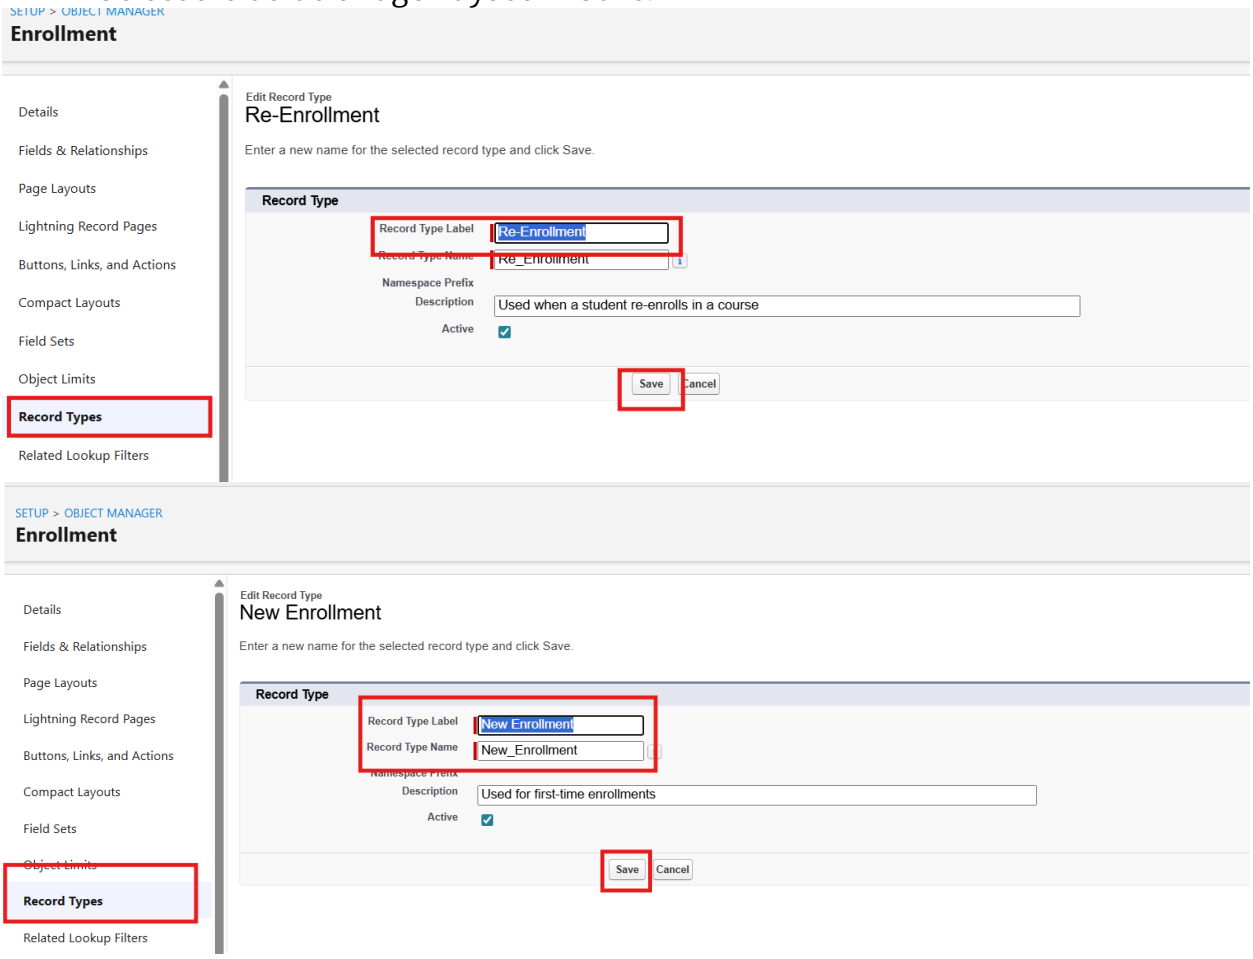

Milestone 9 – Page Layouts and Record:

Activity 1: Create Record Types for Enrollment:

Purpose:
To separate New Enrollment vs Re-Enrollment processes.
Steps:
1.Go to Setup → Object Manager → Enrollment__c.
2.Click Record Types → New.
3.For the first record type:
Existing Record Type: Master
Record Type Label: New Enrollment

Enable for required profiles (Admin, Enrollment Officer).
Select the default Page Layout → Save & New.

4.For the second record type:
Record Type Label: Re-Enrollment
Enable for the same profiles.
Select the default Page Layout → Save.

Activity 2: Separate Page Layout Creators for Each Enrollment Record Type

Purpose:
To show different fields for New Enrollment vs Re-Enrollment.

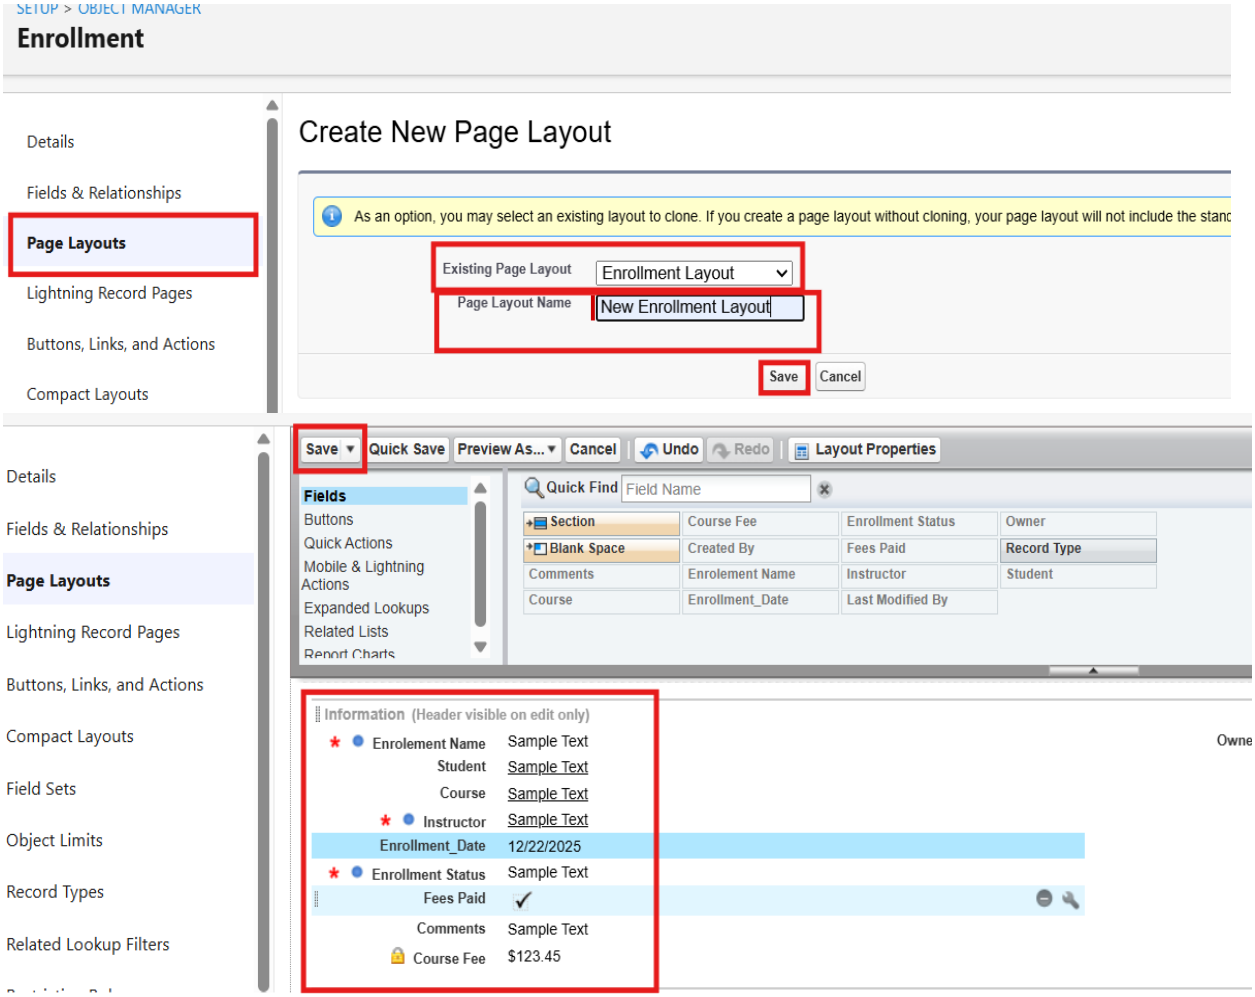

Steps:

1.Enrollment__c object → click Page Layouts.
2.Click New to create a layout for New Enrollment:
Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
Keep fields relevant for first-time enrollment: Student, Course, Instructor,

Enrollment Date, Status, Fees, etc.

Remove unnecessary re-enrollment fields if any.

Click Save.

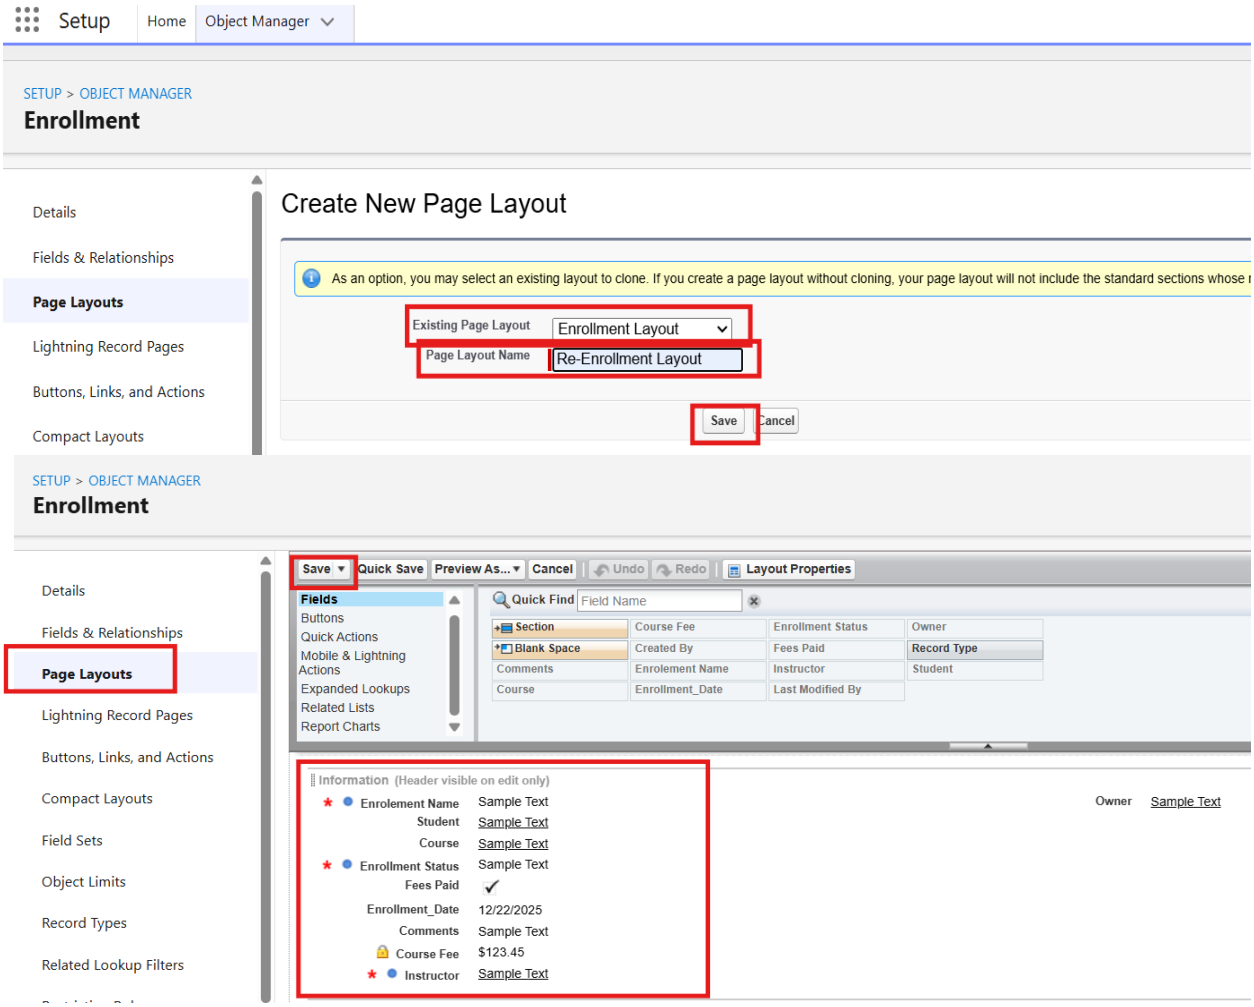

3.Again, click New to create Re-Enrollment Layout:

Clone existing layout → name it Re-Enrollment Layout → Save.

Include fields like previous Enrollment reference (if any), Re-Enrollment Reason, Status, Fees, etc.

Click Save.

4.Click Page Layout Assignment → Edit Assignment.
5.For each profile and record type:

New Enrollment → use New Enrollment Layout.
6.Re-Enrollment → use Re-Enrollment Layout.
Click Save.

Activity 3: Enrollment R Addelated Lists to Parent Objects:

Purpose:
To see all Enrollments from Student, Course, and Instructor records.
a) Student → Enrollment Related List
Go to Setup → Object Manager → Student__c.
Click Page Layouts → open the main layout.

In the palette, select Related Lists.
Drag Enrollments related list onto the layout.
Customize columns if needed → Save.
b) Course → Enrollment Related List
Go to Object Manager → Course__c → Page Layouts.
Open layout → add Enrollments related list.
Save.
c) Instructor → Enrollment Related List
Go to Object Manager → Instructor__c → Page Layouts.
Open layout → add Enrollments related list.
Save.

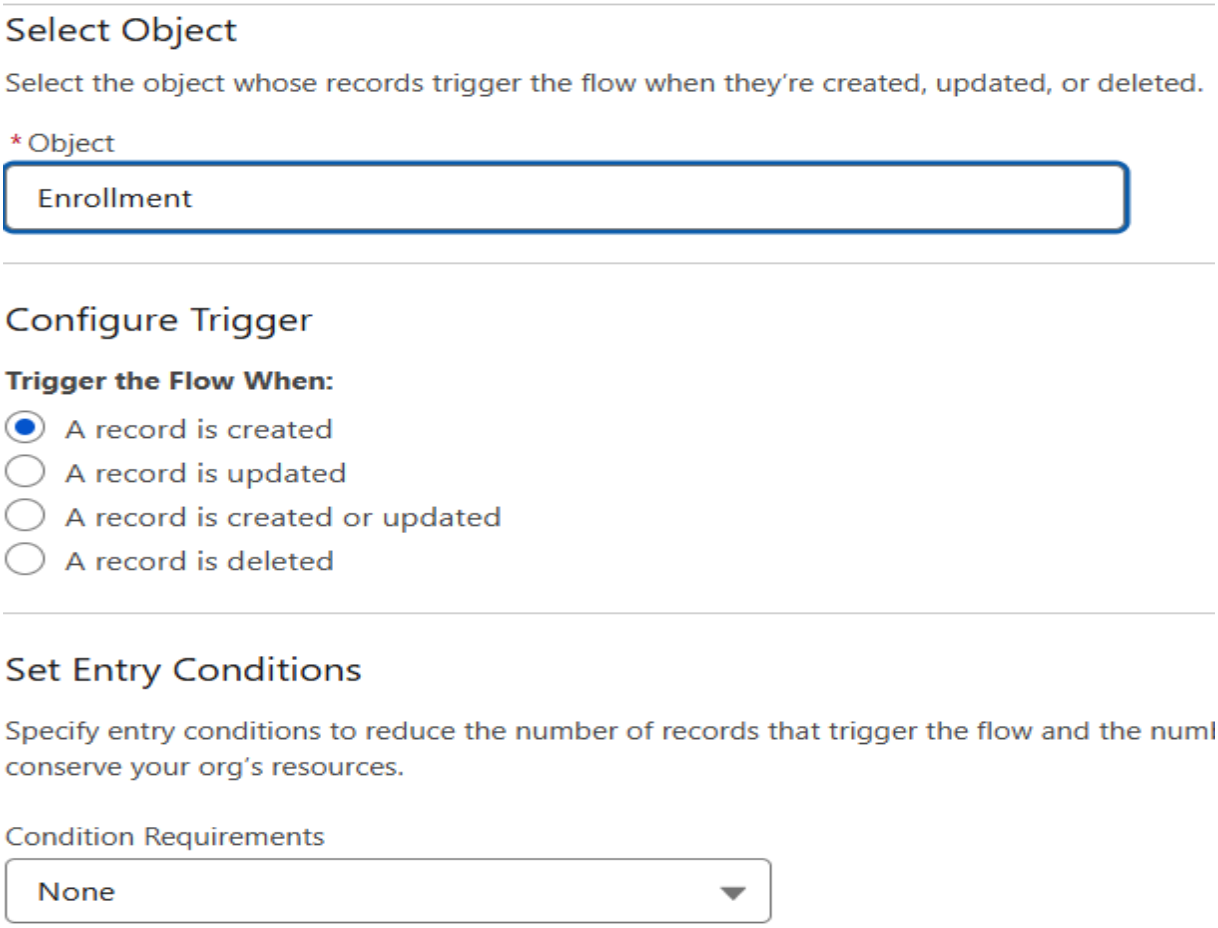

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:
Set Enrollment_Date__c to today when Enrollment is created.

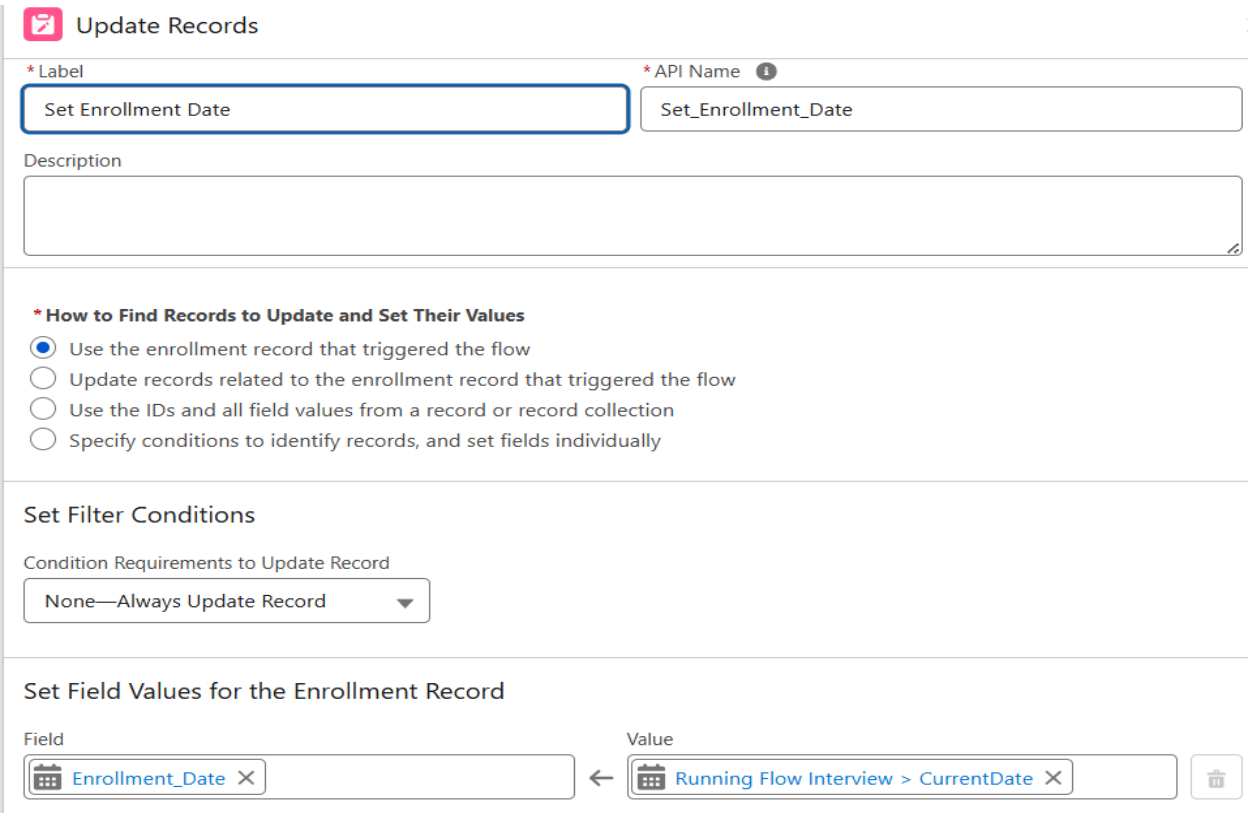

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

6. Add Update Records element:
   Label: Set Enrollment Date.
   Use a record that triggered the flow.
   Field: Enrollment_Date__c → Value: $Flow.CurrentDate.

7.Save as SetEnrollmentDate → Activate.

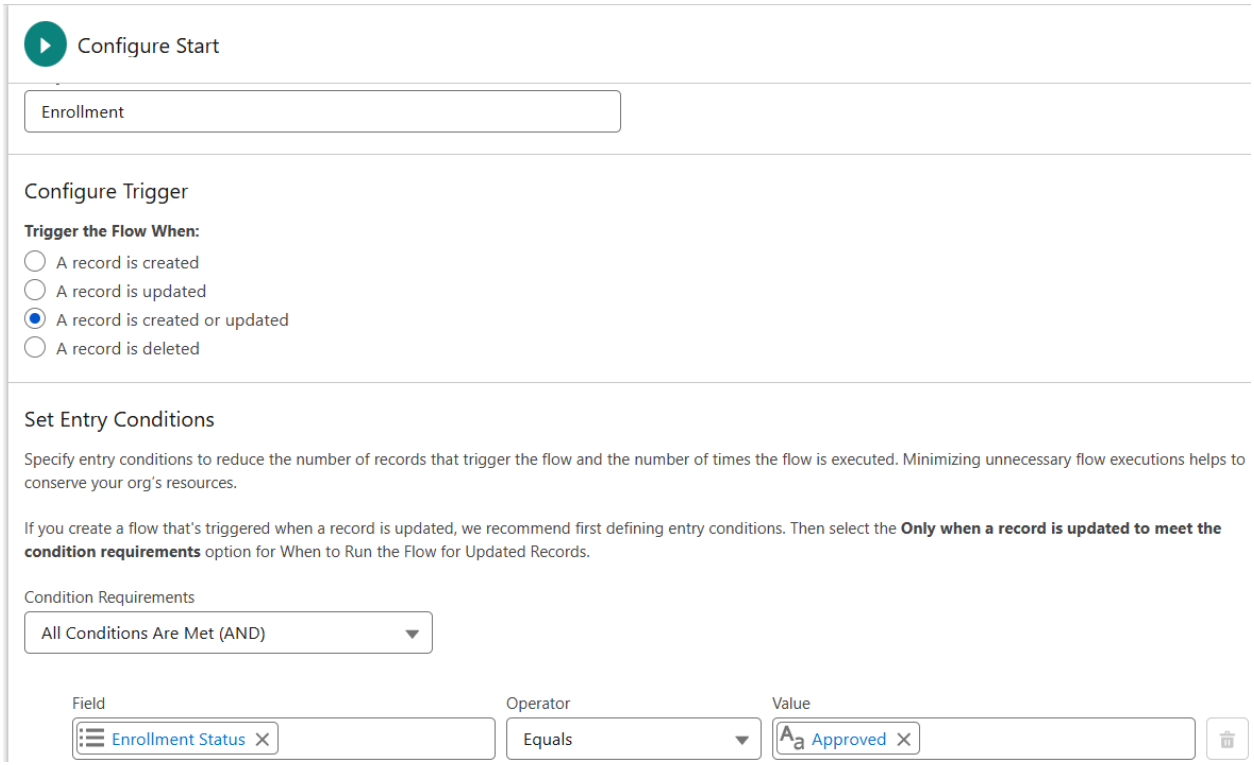

Activity 2: Send Email When Enrollment Approved

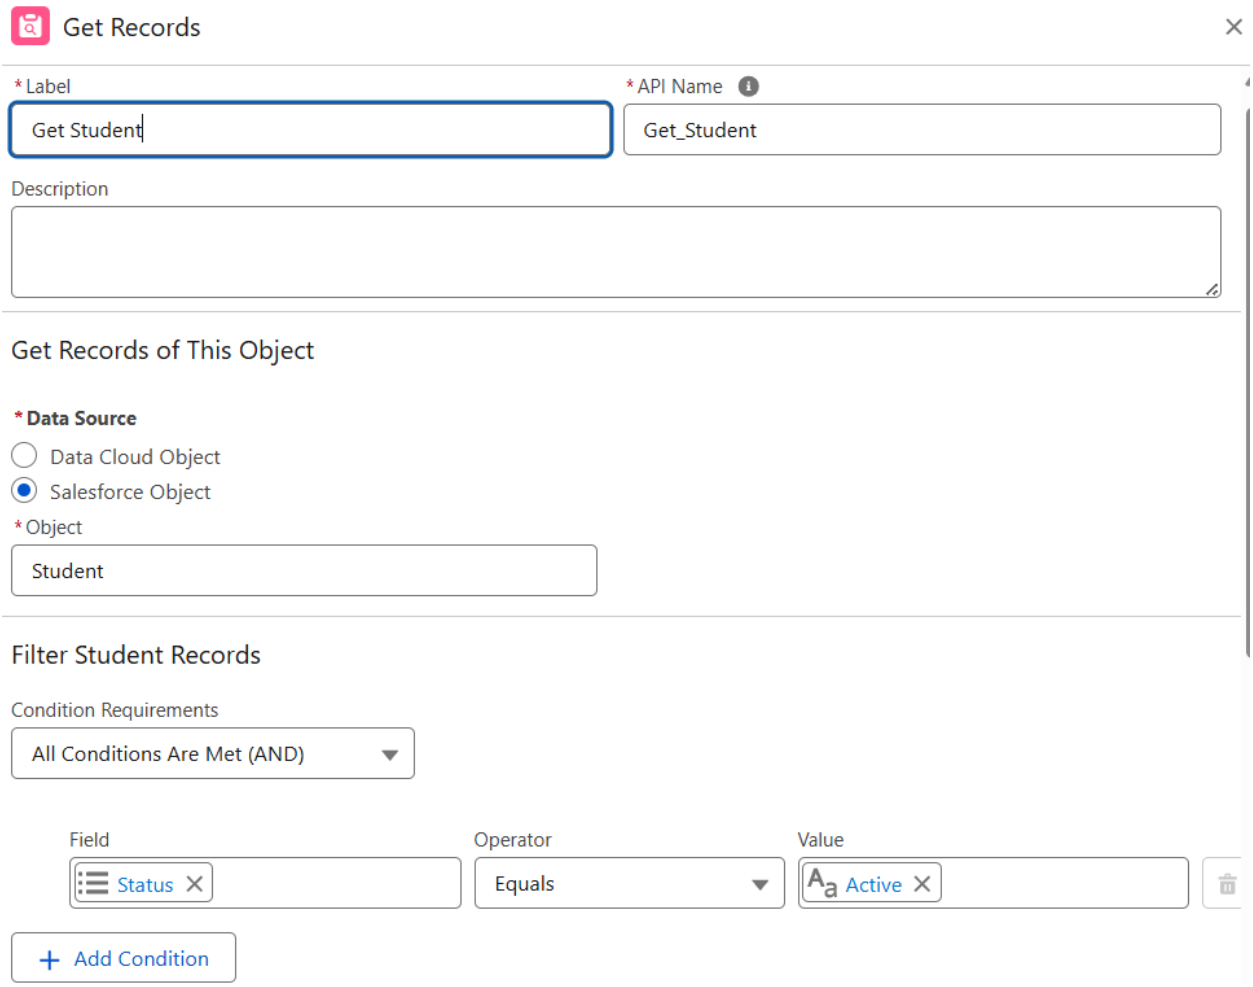

Purpose:
When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.
Steps (high level for document):

1. Create Email Template and Email Alert for student notification.

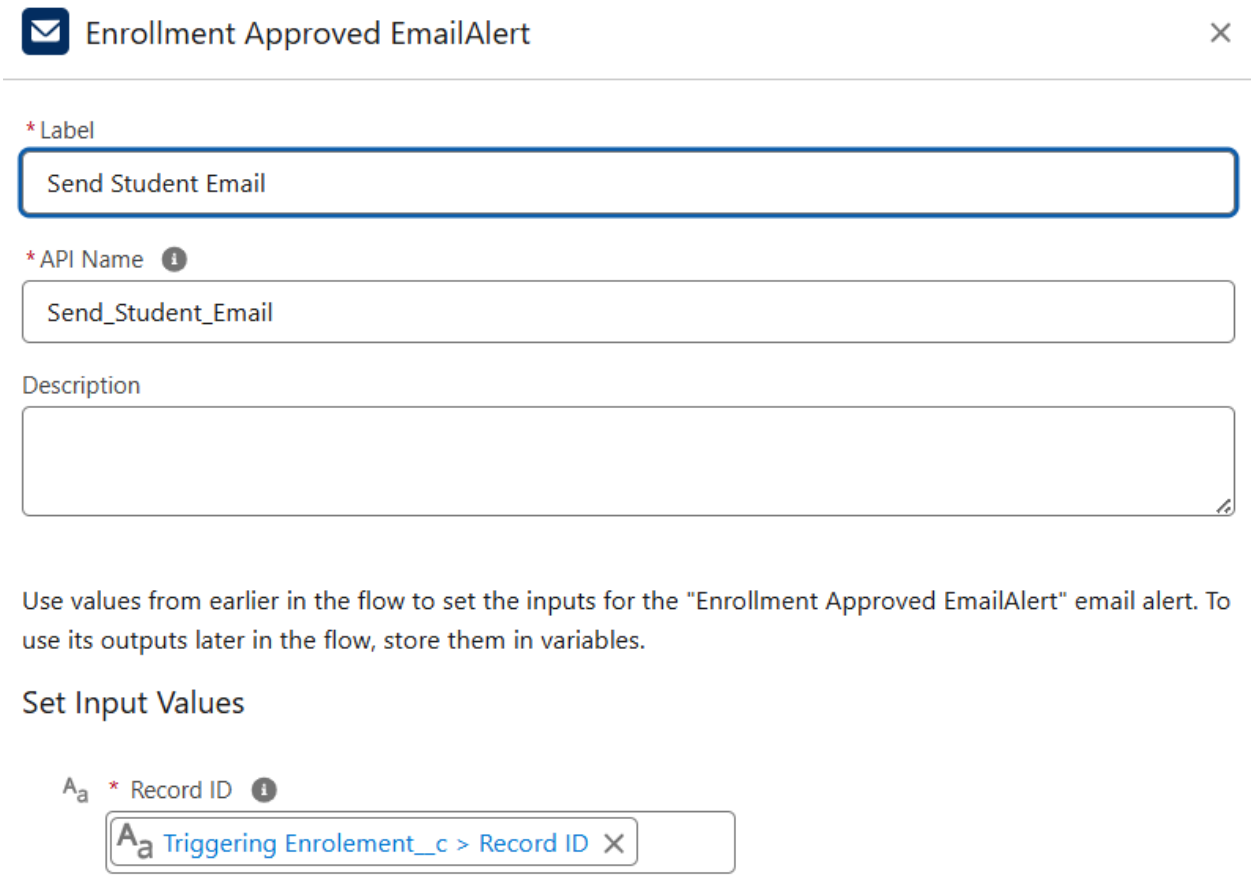

2. Go to Flows → New → Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

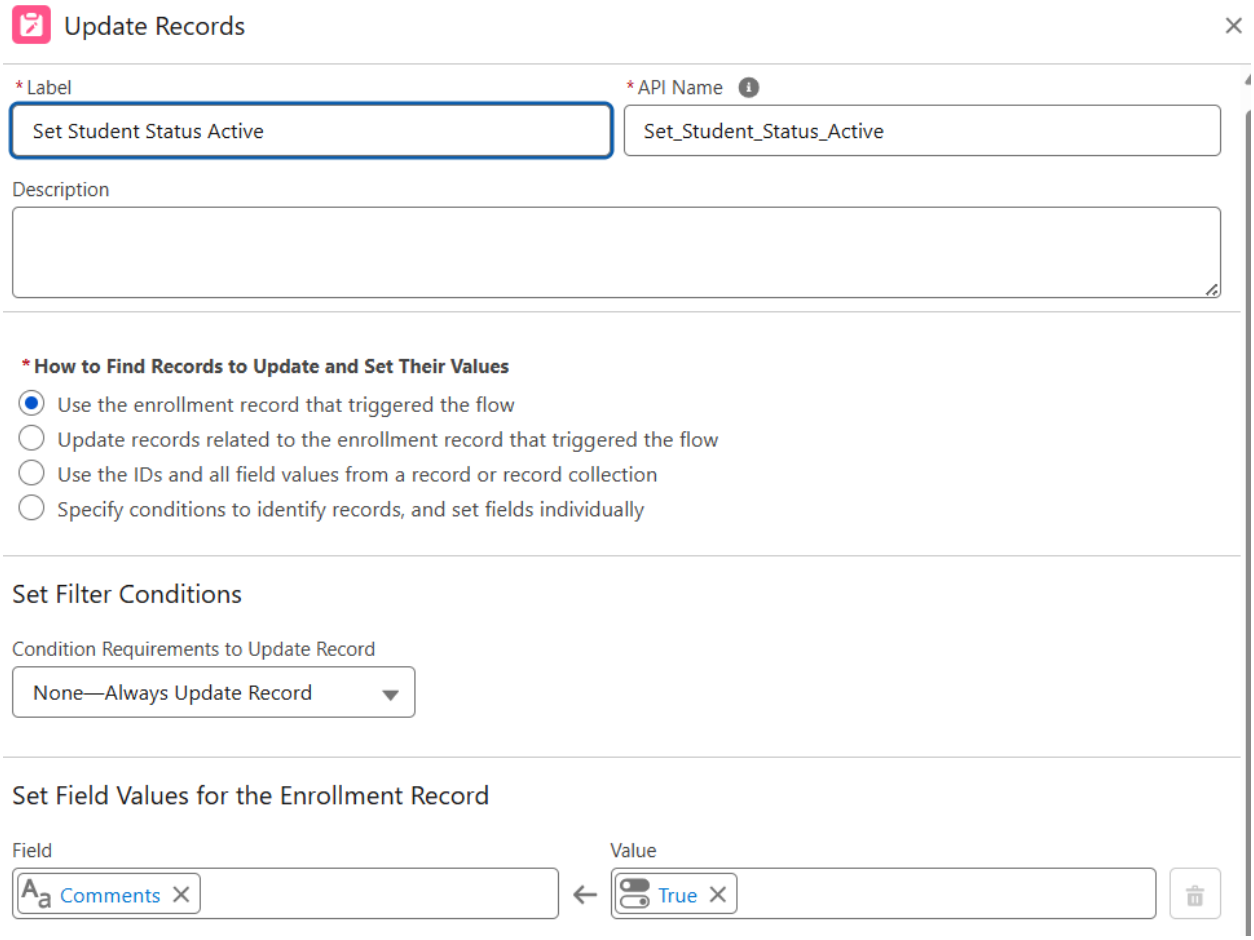

5. Add Get Records to fetch related Student__c.

6. Add Action (Email Alert) to send email to student.

7. Add Action to notify Admin if needed.
8. Add Update Records to set Student__c.Status__c = "Active".

9. Save as Enrollment Approved Action → Activate.

Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:
Assign Instructor automatically based on Course category.

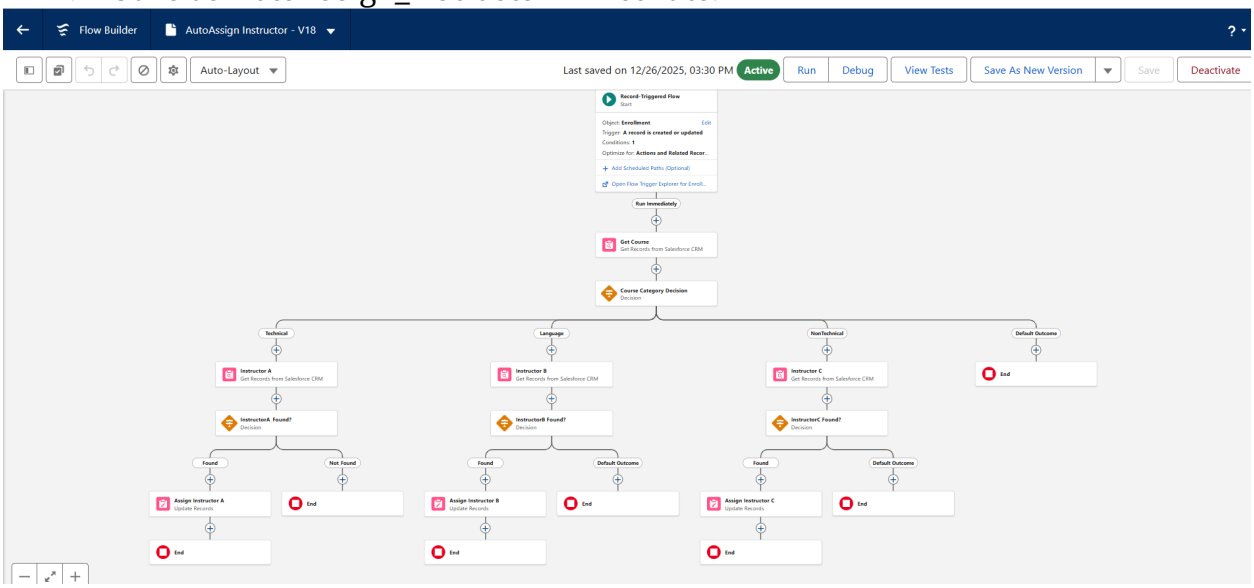

Rules:

Technical → Instructor A
Language → Instructor B
Non-Technical → Instructor C

Steps:

1. Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).

2. Create Record-Triggered Flow on Enrollment__c (created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor__c = Get_Instructor_X.Id.
9. Save as AutoAssign_Instructor → Activate.

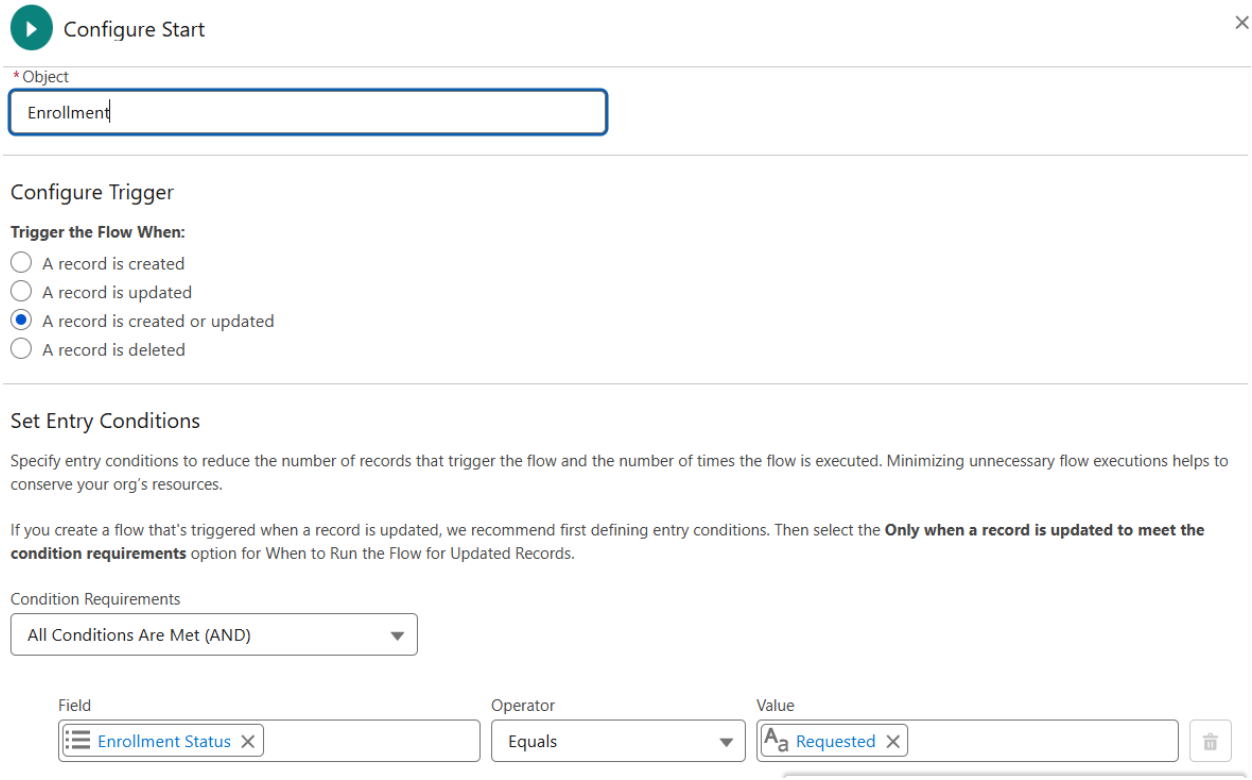

Activity 4: Auto-Create Task for Follow-Up

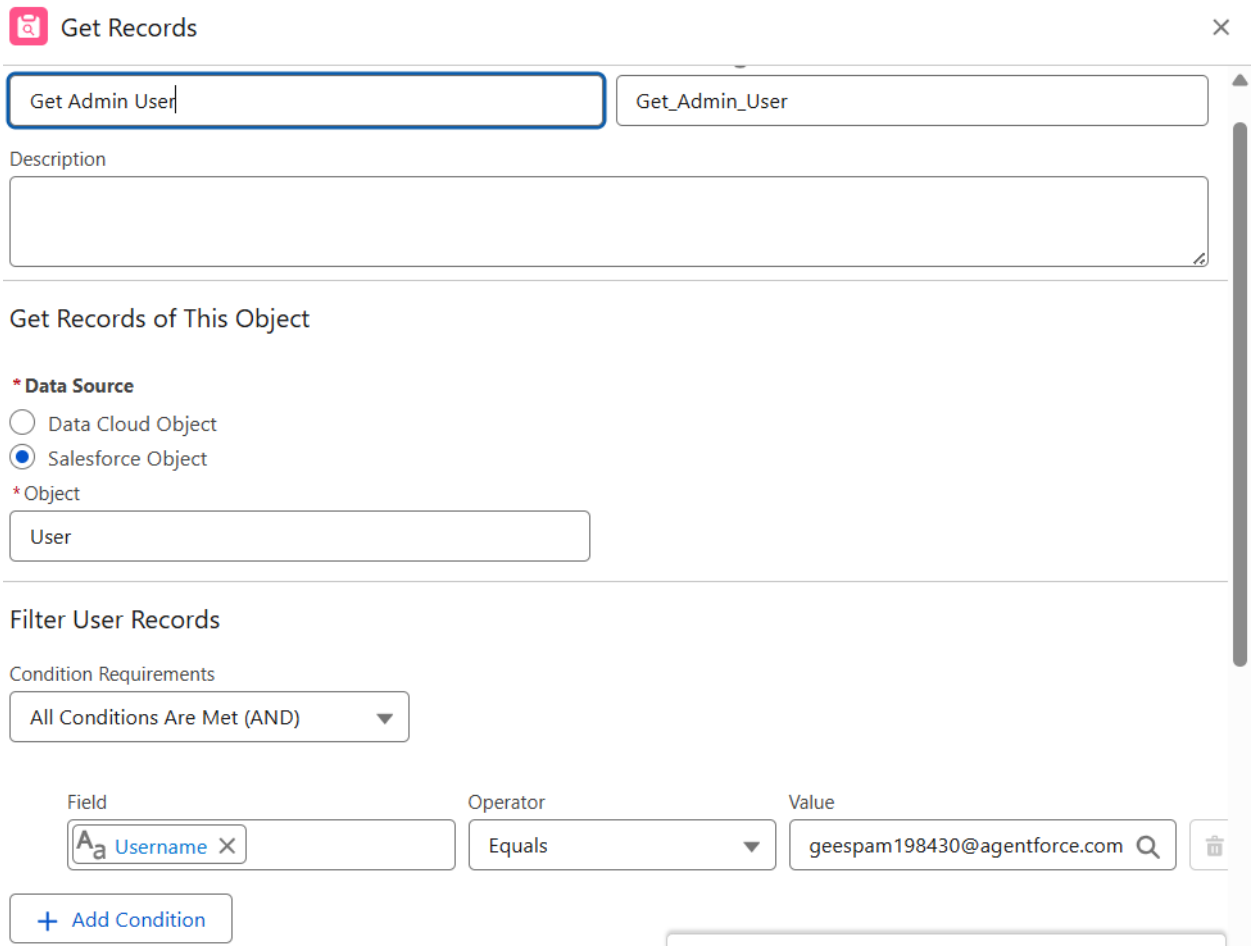

Purpose:
When Enrollment is "Requested", create a follow-up task for Admin.

Steps:

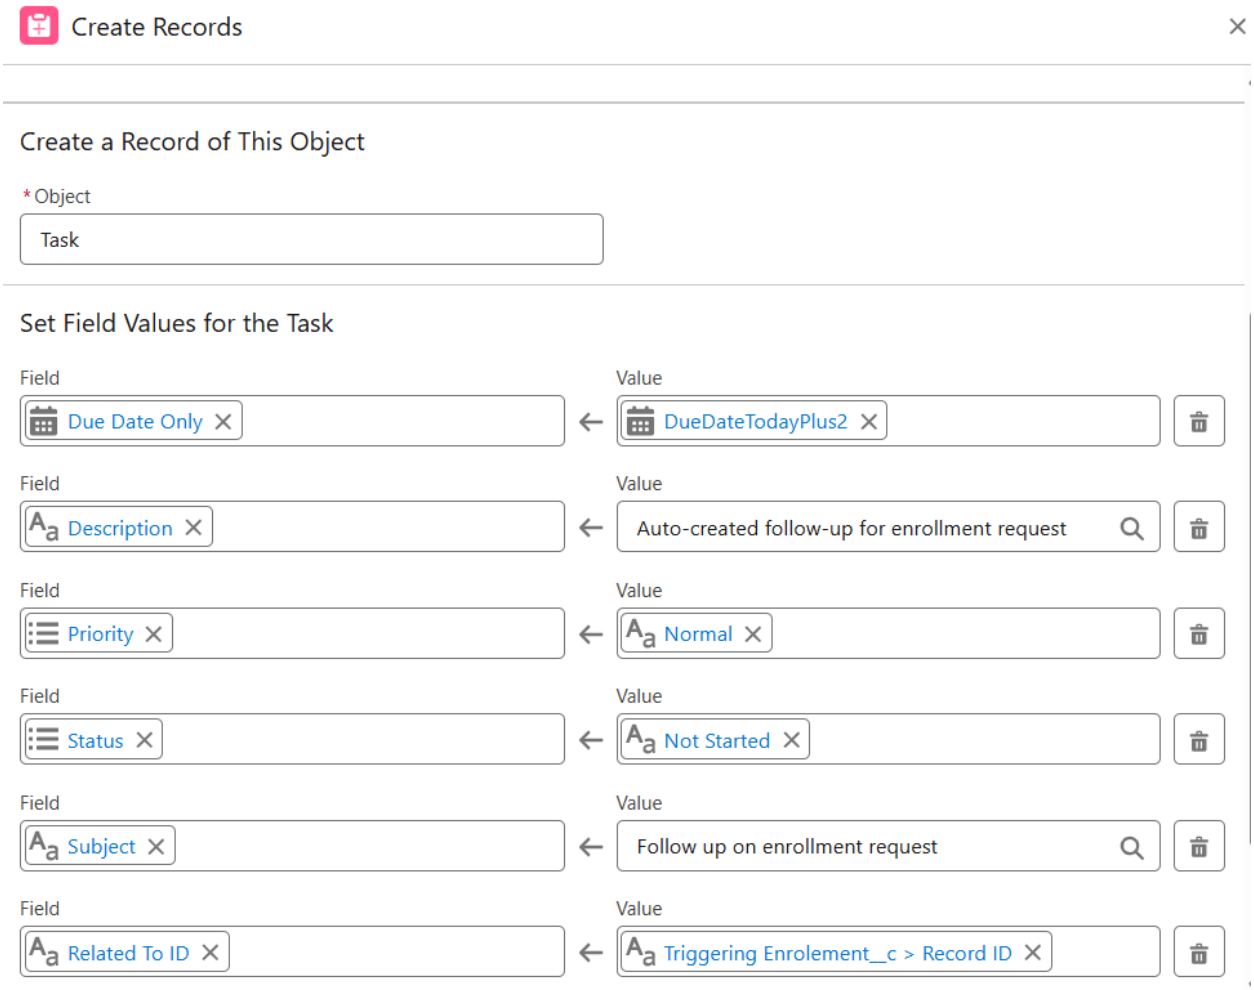

1. Create Record-Triggered Flow on Enrollment__c.
2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

3. Add Get Records to fetch Admin user (by Username / Profile).
4. Add Formula (Date): TODAY() + 2 for due date.

5. Add Create Records for Task:
6. Subject: Follow up on enrollment request.
7. OwnerId: Admin user Id.
8. WhatId: Enrollment Id.
9. ActivityDate: formula Today + 2.

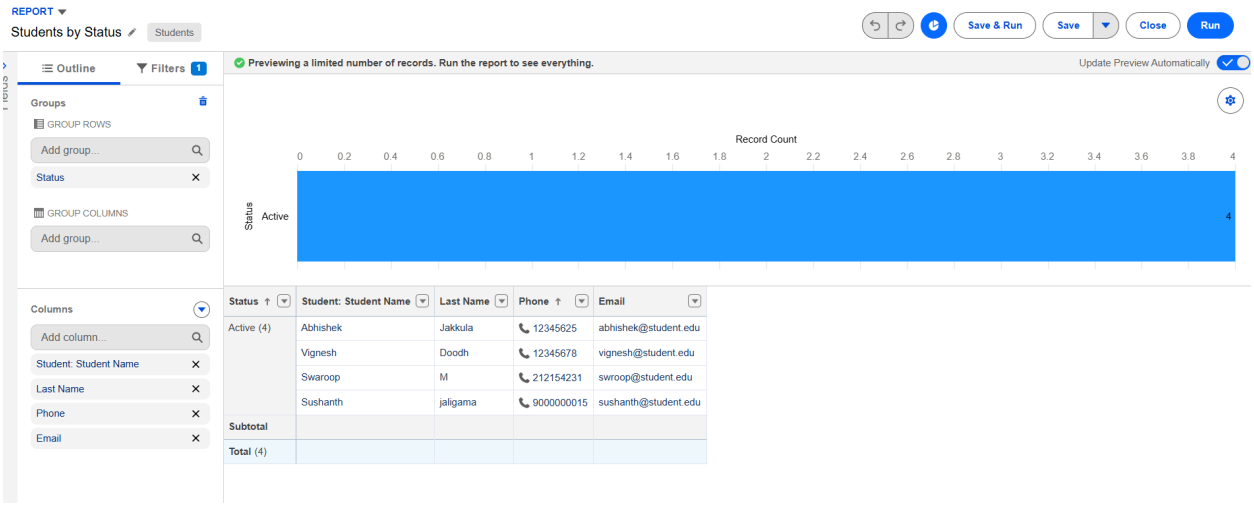

10. Save as Create_Followup_Task → Activate.

Milestone 11 – Reports:

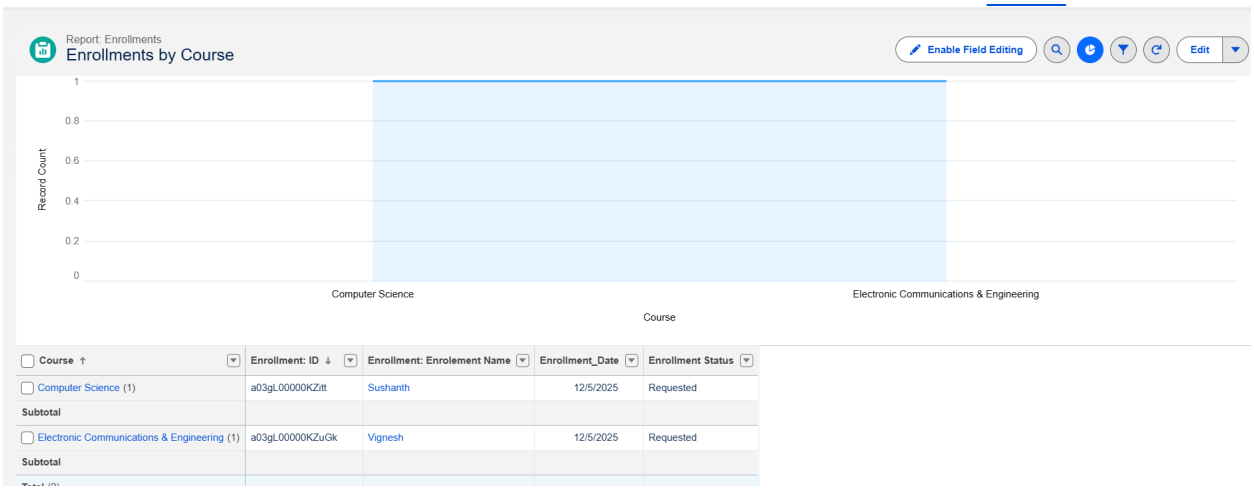

Activity 1: Create "Students by Status" Report

1.Go to **Reports → New Report**
2.Report Type:Students.
3.Group rows by:Status__c.
4.Add columns as needed (Name, Email, Phone).
5.Save as Students by Status

Activity 2: Create "Enrollments by Course" Report

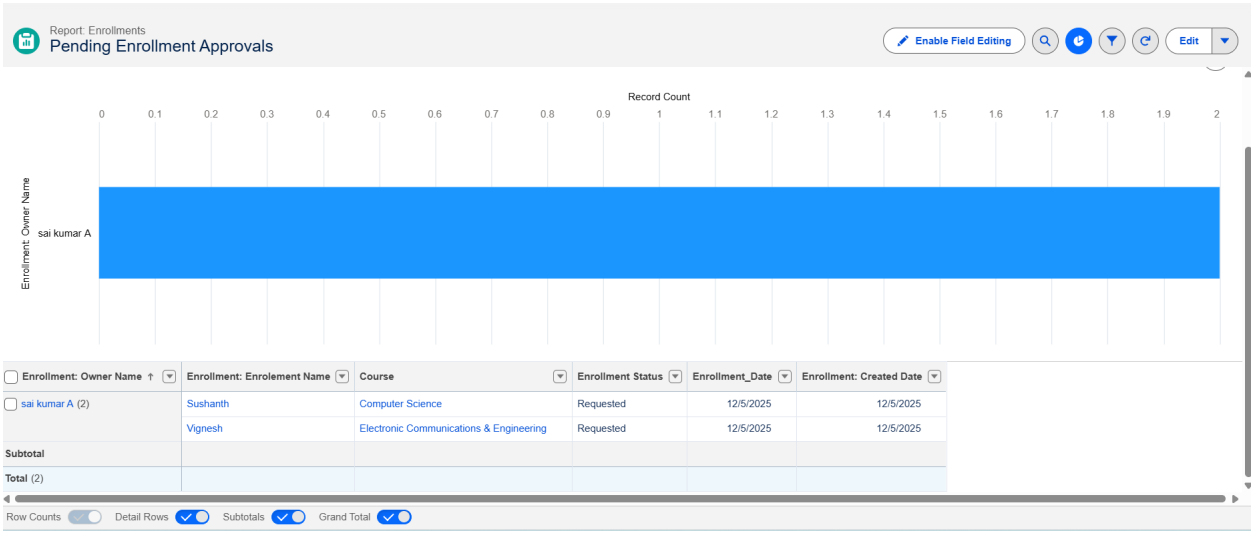

1.New Report → Report Type:Enrollments.
2.Grouprows by:Course__r.Name.
3.Show Record Count per course.
4.Save as Enrollments by Course

Activity 3: Create "Pending Enrollment Approvals" Report

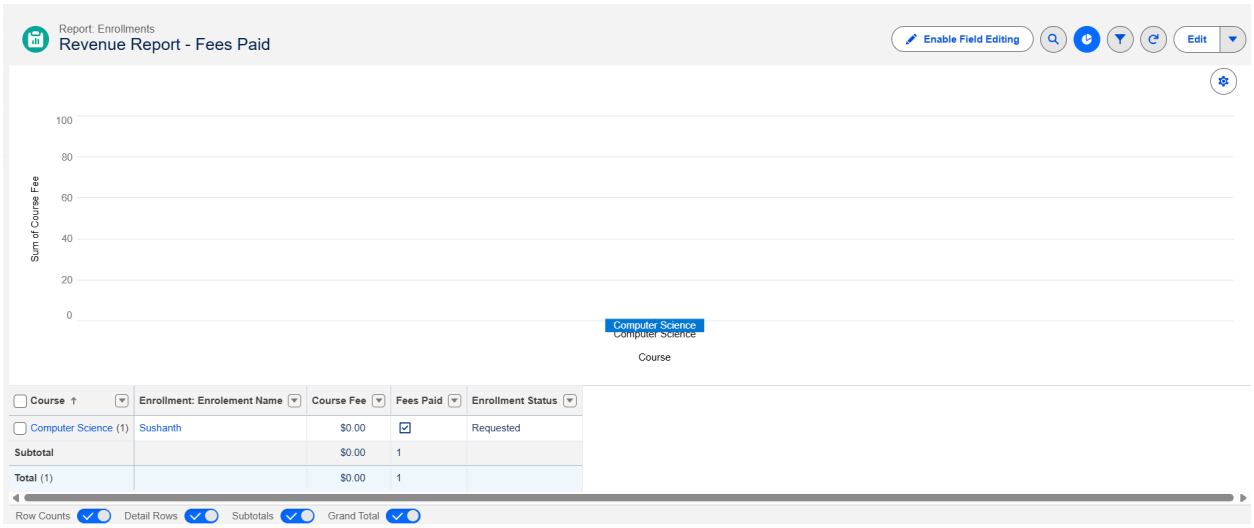

1. New Report →Enrollmentsreport type.
2. Filter:Enrollment_Status__c = "Requested"

3. Add columns (Student, Course, Owner, Created Date).
4. Save as Pending Enrollment Approvals

Activity 4: Create "Revenue Report (Fees Paid)" Report

1.New Report →Enrollmentsreport type.
2.Filter:Fees_Paid__c = TRUE.
3.Group byCourse__r.Name.
4.SummarizeCourse_Fee__c or similar fee field.
5.Save as Revenue Report – Fees Paid

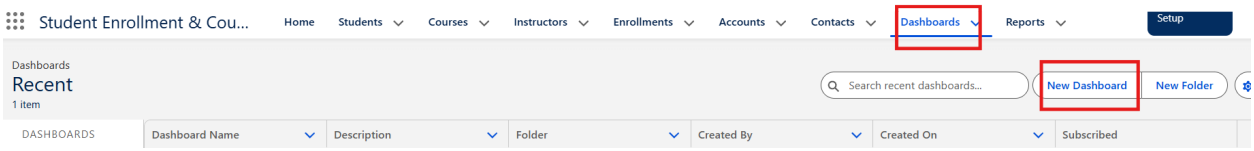

Milestone 12 – Dashboards:

Activity 1: Create "Student Managemet Dnashboard"

Steps:

1. Go to **Dashboards** → **New Dashboard**
2. Name: Student Management Dashboard

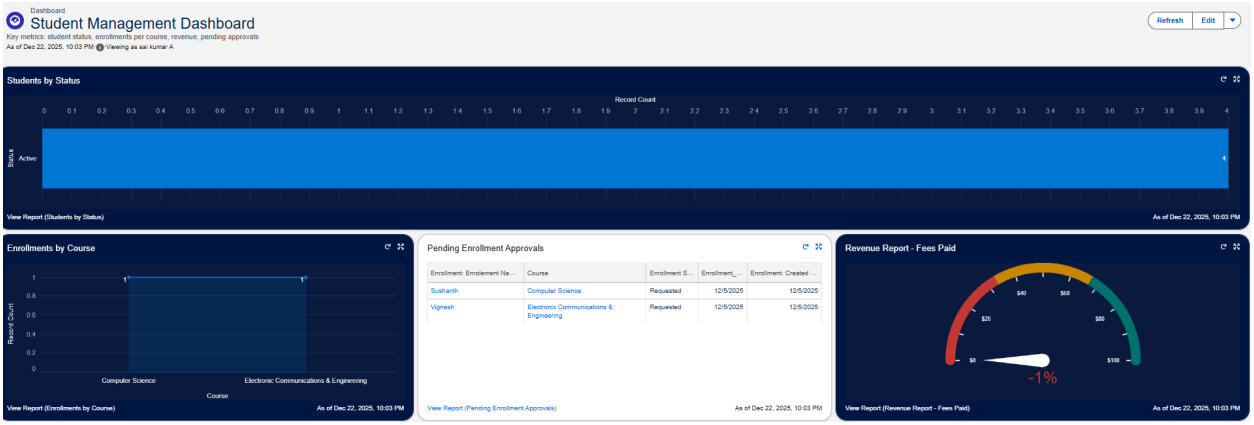

3. Select folder → **Create**.
4. Select the new Dashboard folder and Save.

Add components:

Donut Chart → using Students by Status report.
Bar Chart → using Enrollments by Course report.
Gauge → using Revenue Report – Fees Paid (sum of revenue field).
Table → using Pending Enrollment Approvals report.

1. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

Go to **Setup → Profiles → New** (or Clone). **Profiles Required:**

Admin – Full access.
Enrollment Officer – Create/Update Enrollments.
Instructor – Read-only access to assigned Enrollments.

1. **Steps (example for Enrollment Officer):** Name: Enrollment Officer.
2. In **Object Settings**:
   Enrollment__c: Read, Create, Edit.
   Student__c / Course__c: Read (and Edit if required).
3. Save.

Repeat similarly for **Instructor** profile with **Read-Only** on Enrollments

Activity 2: Create Permission Sets

1. Go to **Setup → Permission Sets → New**
2. Create Custom Object Access (additional access to project objects if needed).
3. Create Dashboard Editor (Create/Customize Reports & Dashboards permissions).
4. Assign to relevant users.

Activity 3: Configure Sharing & OWD 3302BAA479AD6E9B05431D899397CE19

Steps:

1. Go to **Setup → Sharing Settings**
2. Set **Organization-Wide Defaults**

   Students (Student__c): Public Read/Write.

   Courses (Course__c): Public Read/Write.

   Enrollments (Enrollment__c): Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

Add a **User lookup** on Enrollment (Instructor User).

Use a simple **Record-Triggered Flow** to set **OwnerId = Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

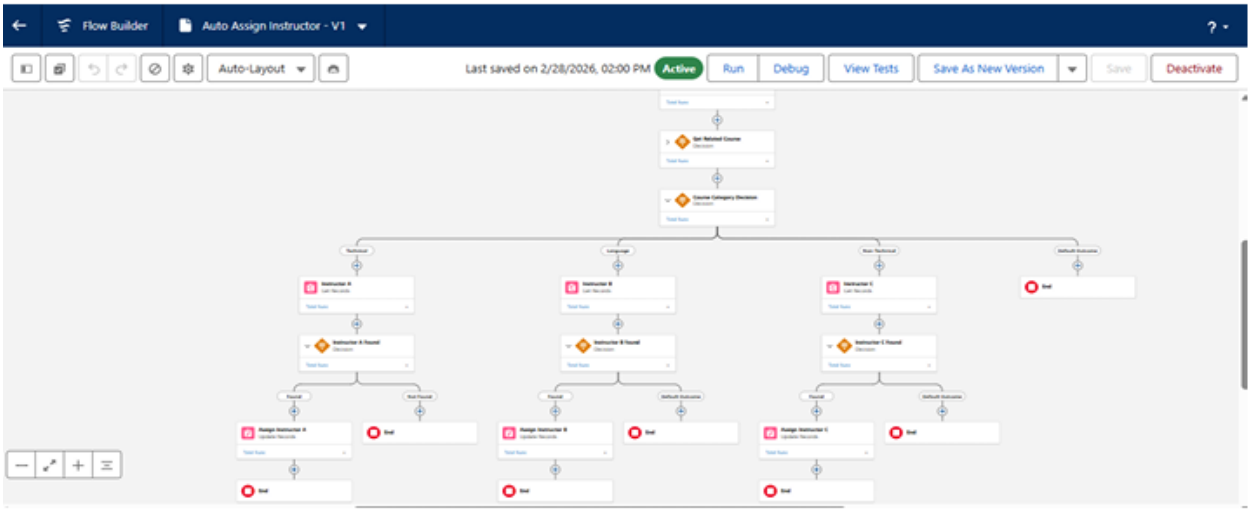

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

Tips

Screenshots were captured as evidence during testing.

Result output:

8. ADVANTAGES & DISADVANTAGES

Advantages

Centralized data
Automated workflows
Real-time reporting

Disadvantages

Salesforce dependency
Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment& Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course

creation to enrollment management, instructor assignment, approvals, revenue tracking,and reporting.By leveragingSalesforce's automationtools such as validation rules,flows, approvalprocesses, and dashboards,the system improvesdata accuracy, operationalefficiency,and decision-making.This project demonstrateshow Salesforce can transformmanualacademic processes into a scalable, reliable,and user-friendly digital solution.

10. FUTURE SCOPE

Payment gateway integration
Student self-service portal
Analytics-driven insights
Mobile access support
